The Budget also requests \$150 million in administrative expenses to support a range of FHA functions, including loan underwriting, claims processing and risk monitoring. The requested funding increase would support the modernization of single-family information technology (IT) systems and is fully offset by the proposed authority to charge lenders a single-family housing IT fee.

Further, the Budget includes legislative proposals that would align FHA authorities with the needs of its lender enforcement program and limit FHA's exposure to risky down-payment assistance practices.

The Capital Reserve account is the ultimate depository for all net budgetary resources collected by the Mutual Mortgage Insurance (MMI) Fund programs. Negative credit subsidy receipts from new loan guarantees and downward reestimates, as well as interest earnings on Treasury investments, are recorded in this account. This account has no authority to obligate funds, but transfers balances of budget authority as necessary for the cost of upward credit subsidy reestimates to the MMI Program Account.

The Federal Housing Administration's General Insurance and Special Risk Insurance (GI/SRI) programs provide mortgage insurance for a variety

of purposes, including financing for the development and rehabilitation of multifamily housing, residential care facilities, and hospitals. The Budget requests a limitation of \$30 billion on loan guarantees for the GI/SRI Fund. GI/SRI's mortgage insurance programs are designed to operate without the need for subsidy appropriations, with fees set higher than anticipated losses. Therefore, the Budget does not request an appropriation of new credit subsidy funds.

GI/SRI programs guarantee loans at 100 percent, with three exceptions where other parties guarantee a portion of the loan: Housing Finance Agency Risk Sharing, Qualified Participating Entity Risk Sharing, and Federal Financing Bank Risk Sharing.

The National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, authorizes the development and enforcement of appropriate standards for the construction, design, installation, and performance of manufactured homes to assure their quality, durability, affordability, and safety. All manufactured homes produced since the standards took effect in 1976 must comply with Federal construction and safety standards. Thirty-four States participate in the program under Department of Housing and Urban Development (HUD) approved State compliance plans and are re-

imbursed by HUD for their activities. HUD administers a compliance program for the remaining 16 States.

HUD coordinates the Manufactured Housing Consensus Committee to recommend revisions to and interpretations of the manufactured housing standards and regulations. HUD also develops and implements model standards for installation of manufactured housing, as well as an installation enforcement program. HUD administers installation enforcement programs in 14 States and oversees HUD-approved programs in 36 States. Finally, HUD administers a dispute resolution program for manufactured housing homeowners, retailers, installers, and manufacturers in 24 States and oversees HUD approved dispute resolution programs in 26 States.

Fees are charged to the manufacturers for each transportable section produced to offset the expenses incurred by the Department in carrying out the responsibilities under the authorizing legislation. The Budget proposes to fund the costs of authorized activities with an estimated \$12 million in fees.

GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

The Government National Mortgage Association was established by Federal charter in 1968. It is a wholly-owned Government corporation within the U.S. Department of Housing and Urban Development (HUD). It was established to support Federal housing initiatives by providing liquidity to the secondary mortgage market and to attract capital from the global capital markets for the Nation's mortgage markets. Its primary function is to guarantee the timely payment of principal and interest on Mortgage-Backed Securities that are backed by loans insured or guaranteed by the Federal Housing Administration, the Department of Veterans Affairs, Rural Development in the Department of Agriculture, and HUD's Office of Public and Indian Housing.

In 2013, a Capital Reserve Account was established for the Government National Mortgage Association (GNMA). Financial reserves of GNMA were transferred from the Reserve Receipt and Liquidating Accounts to the Capital Reserve Account. This mandatory account earns interest on Treasury investments and is the eventual depository for all budgetary resources collected by GNMA including negative subsidy receipts from new security guarantees, downward reestimates, and loan repayments from the Financing Account. This account has no authority to obligate funds but transfers resources to the GNMA Program Account as necessary for mandatory spending authorized in that account.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the Department of Housing and Urban Development's (HUD) mission. These functions are carried out by HUD's Office of Policy Development and Research (PD&R) through in-house analysis by staff; contracts

with industry, nonprofit research organizations, and educational institutions; and cooperative agreements with educational, governmental, and philanthropic entities. In addition, centralized technical assistance for the Department is supported through this account; these funds enable HUD to support its partners with better coordinated, cross-program technical assistance rather than conventional, program-specific assistance.

The Budget requests \$87 million for HUD's Research and Technology (R&T) program. R&T investments support HUD's enterprise-wide commitment to integrate evidence and cross-disciplinary intelligence throughout program policy, management, and operations. The request consists of \$50 million for core research support, surveys, data infrastructure, and knowledge management (i.e., research dissemination); \$10 million for research, evaluations, and demonstrations; and \$27 million for technical assistance.

The Budget requests \$62.3 million for fair housing activities to support efforts to end housing discrimination. Of the amount requested, \$24.3 million is for the Fair Housing Assistance Program (FHAP); \$36.2 million is for the Fair Housing Initiatives Program (FHIP); \$1.5 million is for the National Fair Housing Training Academy (NFHTA); and \$300 thousand is for the Limited English Proficiency Initiative (LEPI). These resources address the national and ongoing problem of discrimination against minority homebuyers and renters, as identified in the 2012 Housing Discrimination Against Racial and Ethnic Minorities Study, and directly supports the Department of Housing and Urban Development's (HUD) mission to create strong, inclusive communities free from discrimination.

The FHAP provides funding to State and local agencies to assure prompt and effective processing of complaints under substantially equivalent State and local fair housing laws. To be eligible for assistance through FHAP, an agency must administer a fair housing law that HUD has certified as substantially equivalent to the Federal Fair Housing Act.

FHIP provides funding to States and local governments, and to public and private non-profit organizations that administer programs to prevent or eliminate discriminatory housing practices through enforcement, education, and outreach. These grants allow the organizations to provide fair housing enforcement through testing in the rental and sales markets, to file fair housing complaints to HUD, and to conduct investigations. Further, the education and outreach activities these organizations conduct also help to educate the public, housing providers, and local governments about their rights and responsibilities under the Fair Housing Act.

The NFHTA provides comprehensive fair housing and civil rights training for investigators, local agencies, educators, attorneys, industry representatives, and other housing industry professionals.

LEPI provides funds for oral interpretation and written translation services, which help make HUD programs and activities accessible to people who are not proficient in English.

The primary purpose of the Lead-Based Paint Hazard Control Grant program is to reduce the exposure of young children to lead-based paint and other environmental hazards in their homes, including protecting them from permanent developmental problems and asthma, and exposure to pesticides and carbon monoxide.

The program plays a critical role in addressing the number one environmental disease impacting children: lead poisoning. The Budget requests \$290 million, including \$240 million for the Department of Housing and Urban Development's (HUD) Lead Hazard Control Program; \$45 million for the Healthy Homes Program; and \$5 million for lead-based paint technical studies and support. The Budget includes an appropriations provision that would allow the transfer of unobligated balances and recaptured funds from undersubscribed competitive programs to other competitive programs experiencing oversubscription.

The Lead Hazard Control Grant Program provides grants of \$1 million to \$5 million to State and local governments and Indian Tribes for control of lead-based paint hazards in pre-1978 private low-income rental and owner-occupied housing. The grants are also designed to facilitate the development of a housing maintenance and rehabilitation workforce trained in lead-safe work practices and a certified hazard evaluation and control industry. In awarding grants HUD promotes the use of new low-cost approaches to hazard control that can be replicated across the nation.

The Healthy Homes program enables the Department to assess and control housing-related hazards that contribute to childhood diseases and injuries. With funding from this program, grantees implement and evaluate methods for controlling two or more housing-related diseases through a single intervention. In addition, Healthy Homes funding is used to provide technical support and training; assist in completion of national surveys; and conduct education and outreach to help State, local and non-governmental agencies, housing industry stakeholders, and the public understand the health and housing relationship and identify and address housing-related health and safety hazards.

The Office of Lead Hazard Control and Healthy Homes will continue its lead-based paint technical studies and support activities, which include public education; support for State and local agencies, private property owners, HUD programs and field offices, and professional organizations; technical studies to improve program policy and implementation; quality control to ensure that the evaluation and control of lead-based paint hazards is done properly in HUD-assisted housing; and development of standards, technical guidance, regulations, and improved testing and hazard control methods.

Sec. 203. COMPETITION IN ACCORDANCE WITH HUD REFORM ACT.—Except as explicitly provided in law, any grant, cooperative agreement or other assistance made pursuant to title II of this Act shall be made on a competitive basis and in accordance with section 102 of the Department of Housing and Urban Development Reform Act of 1989 (42 U.S.C. 3545).

Sec. 204. GNMA LEGAL SERVICES.—Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of the Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal Home Loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811–1).

Sec. 206. TRANSFERS OF ASSISTANCE, DEBT, AND USE RESTRICTIONS.

(a) AUTHORITY.—Notwithstanding any other provision of law, subject to the conditions listed under this section, for fiscal years 2020 and 2021, the Secretary of Housing and Urban Development may authorize the transfer of some or all project-based assistance, debt held or insured by the Secretary and statutorily required low-income and very low-income use restrictions if any, associated with one or more multifamily housing project or projects to another multifamily housing project or projects.

(b) PHASED TRANSFERS.—Transfers of project-based assistance under this section may be done in phases to accommodate the financing and other requirements related to rehabilitating or constructing the project or projects to which the assistance is transferred, to ensure that such project or projects meet the standards under subsection (c).

(c) CONDITIONS.—The transfer authorized in subsection (a) is subject to the following conditions:

(1) NUMBER AND BEDROOM SIZE OF units.—

(A) For occupied units in the transferring project: The number of low-income and very low-income units and the configuration (i.e., bedroom size) provided by the transferring project shall be no less than when transferred to the receiving project or projects and the net dollar amount of Federal assistance provided to the transferring project shall remain the same in the receiving project or projects.

(B) For unoccupied units in the transferring project: The Secretary may authorize a reduction in the number of dwelling units in the receiving project or projects to allow for a reconfiguration of bedroom sizes to meet current market demands, as determined by the Secretary and provided there is no increase in the project-based assistance budget authority.

(2) The transferring project shall, as determined by the Secretary, be either physically obsolete or economically nonviable.

(3) The receiving project or projects shall meet or exceed applicable physical standards established by the Secretary.

(4) The owner or mortgagor of the transferring project shall notify and consult with the tenants residing in the transferring project and provide a certification of approval by all appropriate local governmental officials.

(5) The tenants of the transferring project who remain eligible for assistance to be provided by the receiving project or projects shall not be required to vacate their units in the transferring project or projects until new units in the receiving project are available for occupancy.

(6) The Secretary determines that this transfer is in the best interest of the tenants.

(7) If either the transferring project or the receiving project or projects meets the condition specified in subsection (d)(2)(A), any lien on the receiving project resulting from additional financing obtained by the owner shall be subordinate to any FHA-insured mortgage lien transferred to, or placed on, such project by the Secretary, except that the Secretary may waive this requirement upon determination that such a waiver is necessary to facilitate the financing of acquisition, construction, and/or rehabilitation of the receiving project or projects.

(8) If the transferring project meets the requirements of subsection (d)(2), the owner or mortgagor of the receiving project or projects shall execute and record either a continuation of the existing use agreement or a new use agreement for the project where, in either case, any use restrictions in such agreement are of no lesser duration than the existing use restrictions.

(9) The transfer does not increase the cost (as defined in section 502 of the Congressional Budget Act of 1974 (2 U.S.C. 661a)) of any FHA-insured mortgage, except to the extent that appropriations are provided in advance for the amount of any such increased cost.

**SEC. 213. PHYSICAL CONDITIONS REQUIREMENTS.**—(a)(1) Any entity receiving housing assistance payments shall maintain decent, safe, and sanitary conditions

(2) The requirements in this section shall apply to insured and noninsured projects with assistance attached to the units under section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f), but do not apply to such units assisted under section 8(o)(13) (42 U.S.C. 1437f(o)(13)) of such Act or to public housing units assisted with capital or operating funds under section 9 (42 U.S.C. 1437g) of such Act.

(b) The Secretary may take action under subsection (c) when a multifamily housing project with a section 8 contract or contract for similar project-based assistance:

(1) receives a Uniform Physical Condition Standards (UPCS) score of 59 or less;

(2) fails to certify in writing to the Secretary within 3 business days that all Exigent Health and Safety deficiencies identified by the inspector at the project have been corrected; or

(3) fails to meet UPCS or local code requirements that establish standards for decent, safe, and sanitary housing.

(c) (1) If the Secretary decides to take action based on a deficiency listed in subsection (b), the Secretary must provide the owner with a Notice of Default with a specified timetable, determined by the Secretary, for correcting all deficiencies. The Secretary must also provide a copy of the Notice of Default to the local government, any mortgagees, and any contract administrator. If the owner's appeal results in a UPCS score of 60 or above, the Secretary may withdraw the Notice of Default.

(E) transfer the existing section 8 contract to another project or projects and owner or owners, as determined by the Secretary under established procedures, which will be obligated to promptly make all required repairs and to accept renewal of the assistance contract as long as such renewal is offered;

(F) pursue exclusionary sanctions, including suspensions or debarments from Federal programs;

(G) seek judicial appointment of a receiver to manage the property and cure all project deficiencies or seek a judicial order of specific performance requiring the owner to cure all project deficiencies;

(H) work with the owner, lender, or other related party to stabilize the property in an attempt to preserve the property through compliance, transfer of ownership, or an infusion of capital provided by a third-party that requires time to effectuate; or

(I) take any other regulatory or contractual remedies available, including abatement, suspension, or termination of the section 8 contract, as deemed necessary and appropriate by the Secretary.

(d)(1) Any Notice of Default issued pursuant to subsection (c)(1) shall include a requirement that the owner provide a copy of the Notice of Default to each tenant.

(2) The Secretary shall ensure that the owner or its agents provide tenants an opportunity to comment on the physical condition and management of the property, and any needed repairs. The Secretary may provide the substance of these communications to the project owner to assist in its corrective opportunity.

(3) If the Secretary terminates the section 8 contract pursuant to subsection (c)(2), the Secretary shall provide tenants with a copy of any notice to the owner to that effect.

(e) The Secretary shall report quarterly on all properties covered by this section that are assessed through the Real Estate Assessment Center and have UPCS physical inspection scores of less than 60 or have received an unsatisfactory management and occupancy review within the past 36 months. The report shall include—

## LAND AND MINERALS MANAGEMENT

### BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on more than 245 million acres of surface estate of public land, about one-eighth of the land in the United States. The BLM also administers approximately 700 million acres of on-shore Federal mineral estate underlying the BLM and other surface ownerships. In addition, the BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) surveys. The lands managed by the BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of the BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations. In 2020, the BLM proposes to change its budget structure to better focus the organization on meeting its responsibilities and executing its multiple use mission under the Federal Land Policy and Management Act.

**Land resources.**—Provides for the integrated management of public land resources, including forestry, rangeland, and cultural resources, as well as wild horses and burros. The 2020 Budget reconfigures several programs under this heading as part of the Bureau's efforts to more easily foster development of integrated programs of work that enhance the organization's focus on its mission under the Federal Land Policy and Management Act (FLPMA). The Budget will restructure the Soil, Water and Air Management, and the Riparian Management subactivities. Soil resource programs previously funded in the Soil, Water and Air Management subactivity will be funded within the Rangeland Management program. Aquatic activities that had been previously funded within the Soil, Water and Air Management subactivity, along with the Riparian Management subactivity will be consolidated into the Wildlife and Aquatic Habitat Management activity.

**Wildlife and aquatic habitat management.**—The 2020 Budget renames this activity to encompass programs that provide for the maintenance, im-

MANAGEMENT OF LANDS AND RESOURCES—Continued

provement, or enhancement of wildlife habitats, including the habitats of threatened, endangered and special status animal and plant species; as well as the management of water resources and riparian and wetlands areas, as part of the management of public lands and ecosystems. These programs include the aquatic portion of the Soil, Water and Air Management program, the Riparian Management program, the Wildlife and Fisheries Management programs, and the Threatened and Endangered Species program.

*Threatened and endangered species management.*—Provides for protection, conservation, consultation, recovery, and evaluation of populations and habitats of threatened, endangered and special status animal and plant species. The Budget proposes to merge the threatened and endangered species activities with wildlife and aquatic habitat programs.

*Recreation management.*—Provides for management and protection of recreational resource values, designated and potential wilderness areas, and collection and expenditure of recreation user fees.

*Energy and minerals management.*—Provides for management of onshore oil and gas; coal; renewable energy resources such as wind, solar, and geothermal energy; other leasable minerals and mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. The 2020 Budget funds oil and gas management activities through a combination of direct appropriations and permanent appropriations authorized by the National Defense Authorization Act of 2015.

*Realty and ownership management.*—Provides for management and non-reimbursable processing of authorizations and compliance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands. Provides for the processing of communication site use authorization requests.

*Resource protection.*—Provides for management of the land use planning and National Environmental Policy Act processes, including assessment and monitoring activities. Also ensures the health and safety of users of the public lands through remediation of abandoned mine lands and protection from criminal and other unlawful activities; the effects of hazardous material and/or waste; and physical safety hazards.

*Transportation and facilities management.*—Provides for construction and maintenance of administrative and recreation sites, roads, trails, bridges and dams, including compliance with building codes and standards and environmental protection requirements. These funds allow for the systematic management of facilities with critical health and safety concerns, and ensure the protection of natural and cultural resources and the environment. The Bureau of Land Management funds all construction and deferred maintenance projects from this activity, including those on the Oregon and California grant lands.

*National Conservation Lands.*—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations in the National Conservation Lands. The program provides for the recurring operational (base) budgets of these units.

*Workforce and organizational support.*—Provides for the management of bureau business practices, such as human resources, Equal Employment Opportunity, financial resources, procurement, property, information technology, and fixed costs.

*Mining law administration.*—Provides for exploration and development of minerals on public lands pursuant to the General Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are expected to be fully offset by claim maintenance and other fees in 2020.

*Western Oregon resources management.*—Provides for the management of approximately 2.4 million acres of lands that are primarily forested ecosystems in western Oregon. These lands support a number of resource activities including timber management, grazing management, and recreation management. In support of these activities, the Bureau of Land Management (BLM) is involved in improving critical watersheds, restoring wildlife and fish habitat, providing safe recreation opportunities, and preserving cultural resources. The President's Budget proposes to consolidate these activities with the Western Oregon National Conservation Lands activity into the Western Oregon Grant Lands Management activity.

*Western Oregon information and resource data systems.*—Provides for the acquisition, operation, and maintenance of the automated data support systems and spatial data systems required for the management of the Oregon and California programs.

*Western Oregon transportation and facilities maintenance.*—Provides for the maintenance activities for the transportation system, office buildings, warehouse and storage structures, shops, greenhouses, and recreation sites necessary to assure public safety and effective management of the lands in western Oregon. The BLM funds deferred maintenance projects on Oregon and California Grant Lands from the Management of Lands and Resources appropriation.

*Western Oregon acquisition.*—Provides for the necessary acquisition of easements and road-use agreements to facilitate timber sale and administrative site access for general resource management purposes and for monitoring and fee collection of timber haul on government controlled roads. This activity also provides for transportation planning, survey, and design of access and other resource management roads.

*Western Oregon grant lands management.*—The 2020 Budget proposes to consolidate resource management, and management of National Monuments and National Conservation Areas and other similar congressionally designated areas in western Oregon in order to ensure sustainable management and conservation of BLM-managed natural resources while supporting local communities. These resources are located on 2.4 million acres of land that are primarily forested ecosystems, and support a number of resource activities including timber, grazing, and recreation management.

and recreation use, preservation of open space, resource protection, and/or other purposes related to the management of public lands. To focus resources on caring for current Department of Interior lands, the 2020 Budget does not request funding for major land acquisition projects and proposes a partial cancellation of prior year balances.

## Permanent operating funds accounts include:

*Operations and maintenance of quarters.*—Funds in this account are used to maintain and repair the Bureau of Land Management (BLM) employee-occupied quarters from which rental charges are collected. Agencies are required to collect rental charges from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

*Forest ecosystems health and recovery.*—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. Pursuant to Public Law 102-381, as amended, this account was established to allow the BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments. This account will expire on September 30, 2020 under current law.

*Timber sale pipeline restoration fund.*—This Fund provides for the deposit and use of fees collected by the BLM for sales of timber authorized by section 2001(k) of Public Law 104-19. Of the total deposited into this account, 75 percent is to be used for the preparation of timber sales to fill the timber pipeline on lands administered by the BLM, and 25 percent is to be used to address recreation projects on the BLM lands.

*Stewardship contract product sales.*—Stewardship contracting improves, maintains, or restores forest and rangeland health; restores or maintains water quality; improves fish and wildlife habitat; reestablishes native plant species and increases their resilience to insects and disease; and reduces hazardous fuels that pose risks to communities and ecosystem values. With stewardship contracting, the BLM may apply the value of timber or other forest products removed as an offset against the cost of services received, and monies from a contract may be retained by the BLM. These monies are available for expenditure without further appropriation at project sites.

*Expenses, road maintenance deposits.*—Users of certain roads under the BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

*Federal Lands Recreation Enhancement Act, BLM.*—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004, as part of the Consolidated Appropriations Act for 2005. All recreation fee receipts collected under this authority at BLM sites are deposited in the Recreation Fee account. The BLM returns 100 percent of these receipts back to the site where the fees were generated. The Administration proposes a two-year extension of FLREA in appropriations language and legislation to reauthorize this authority currently set to expire on September 30, 2020.

*Operations and acquisitions in Nevada from land sale receipts.*—Pursuant to Public Law 105-263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, the U.S. Fish and Wildlife Service and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and im-

plement other conservation initiatives in Clark County, Nevada; and reimburse the BLM for costs incurred arranging sales and exchanges under the Act.

*Lincoln County Land Sales Act.*—Public Law 106-298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the county; and 85 percent to an interest bearing account available for expenditure without further appropriation to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*White Pine County Land Sales Act.*—Public Law 109-432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, and to distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the county; and 85 percent to an account available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

*Leases from Naval Petroleum Reserve No 2.*—The 2005 Energy Policy Act established this Fund for environmental investigation and restoration on that site located in Kern County, California. A portion of revenue from new leases on the site is authorized to be deposited to this account. In 2008, it was certified that sufficient funds had been collected to cover the cost of the cleanup and other expenses and no more deposits were to be made to the Fund. New revenue from site operations is distributed under the Mineral Leasing Act.

*BLM Permit Processing Improvement Fund.*—The 2005 Energy Policy Act, as amended by the National Defense Authorization Act for Fiscal Year 2015, established pilot offices to improve interagency coordination in processing onshore Federal oil and gas permits. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this Fund and used to facilitate the BLM oil and gas permit processing in these pilot offices. In addition, in 2016 through 2026, fees collected for processing applications for permits to drill will be deposited to this Fund.

*Federal land disposal.*—The Federal Land Transaction Facilitation Act, Public Law 106-248 (114 Stat. 613), provided authority for the BLM to sell public lands classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provided that receipts from such sales could be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior. This authority expired on July 25, 2010, and was later reauthorized through July 25, 2011. All funds not obligated by both expiration dates were transferred to the Land and Water Conservation Fund. The Federal Land Transaction Facilitation Act was permanently reauthorized by Public Law 115-141, the 2018 Consolidated Appropriations Act.

*Owyhee Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111-11 (123 Stat. 1039), provides that the Secretary may sell public land located within the Boise District of the BLM that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to certain wilderness areas.

*Washington County, Utah Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111-11 (123 Stat. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land, in or adjacent to certain wilderness areas.

PERMANENT OPERATING FUNDS—Continued

*Silver Saddle Endowment Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1114), requires Carson City, Nevada to deposit twenty-five percent of the difference between what the Secretary of the Interior and the City paid for the 62-acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

*Carson City Special Account.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to the State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to cover the cost of surveys and appraisals; and to reimburse the BLM for administrative expenses.

*Ojito Land Acquisition.*—The Ojito Wilderness Act authorized the sale of land to the Pueblo Indian Tribe and the purchase of land from willing sellers within the State of New Mexico.

Miscellaneous permanent payments include:

*Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.*—The Secure Rural Schools and Community Self-Determination Act of 2000 (as amended by P.L. 115–141), provides annual revenue sharing payments to the 18 O&C counties. These payments are derived from revenues from Federal activities on O&C lands in the previous fiscal year that were not deposited to permanent operating funds, supplemented by amounts from the General Fund when necessary. The reauthorization of these payments covers 2017 and 2018, and allowed for a special "make-up" payment for 2017 after receipt-based payments were already made for 2017. In the absence of this authority in 2019 and beyond, eligible counties will receive funds authorized under 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute will be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and are estimated to be 75 percent of all revenues from Coos Bay Wagon Road grant lands.

*Payments to States (proceeds of sales).*—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc, public lands outside grazing districts.*—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc, public lands within districts.*—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc, public lands within grazing districts, miscellaneous.*—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to counties, National Grasslands.*—Of the revenues received from the use of Bankhead-Jones Act lands administered by the Bureau

of Land Management (BLM), 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Payments to Nevada from receipts on land sales.*—A) Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). B) Public Law 105–263, as amended by Public Law 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, Fish and Wildlife Service, and the BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails, and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse the BLM for costs incurred arranging sales and exchanges under the Act. C) Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*Cook Inlet Region, Incorporated Account.*—This account received funding appropriated by section 9102 of the 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). The BLM maintains an accounting of the funds used by the Cook Inlet Region, Incorporated to purchase properties.

*State 5 Percent Share, Carson City Land Sales.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 Stat. 1113), requires that five percent of proceeds from the sale of 158 acres described in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996 (HPA), Public Law 104-273, provided for the eventual privatization of the program and its functions, specifying that once the helium debt is retired, the Helium Production Fund would be dissolved. The debt was repaid at the beginning of 2014. The Helium Stewardship Act of 2013 (HSA), Public Law 113-40, provided for continued operation of the Helium program while facilitating a gradual exit from the helium market. The Helium program consists of: (a) continued storage and transmission of crude helium; (b) oversight of the production of helium on Federal lands; and (c) administration of in-kind and open market crude helium gas sale programs. To minimize impacts to the helium market, the HSA provides a "glide path" from the sales mandated under HPA, increasing the sales price of helium through an auction mechanism and reducing the total volume of helium sold each year until the amount in storage reaches 3.0 billion cubic feet. At that point, the remaining helium

will be reserved for Federal users. Additionally, HSA provides a hard deadline to sunset the program and sell off the program assets by 2021.

The Bureau of Ocean Energy Management (BOEM) manages the exploration and development of the nation's offshore energy and marine mineral resources on the U.S. Outer Continental Shelf (OCS). These marine resources include vast deposits of oil and natural gas, non-energy minerals, as well as renewable resources such as offshore wind, wave and ocean currents. BOEM's goal is to balance economic development, energy security, and environmental protection through responsible and transparent management of offshore resources based on the best available science. To carry out this mission, BOEM manages OCS energy and mineral resources, including: OCS leasing, inventories of oil and gas reserves, resource and economic evaluation, review and administration of oil and gas exploration and development plans, geological and geophysical (G&G) permitting, risk management and financial assurance, conveyance of sand and gravel resources, renewable energy development, National Environmental Policy Act (NEPA) analysis, and environmental studies.

The Ocean Energy Management account includes the following budget activities: Conventional Energy, Renewable Energy, Environmental Programs, Marine Minerals, and Executive Direction.

**Conventional Energy.**—Supports OCS oil and gas leasing, including development of the National OCS Oil and Gas Leasing Program; implementing the lease sale process; administering leases; protecting the Federal government from financial risks related to natural resource development; reviewing exploration and development plans and geological and geophysical permit applications; developing and maintaining the OCS cadastre; conducting technical and economic resource evaluation and fair market determination.

**Renewable Energy.**—Oversees renewable energy program development and implementation, including: identification of wind energy areas; environmental and compliance work; competitive and noncompetitive leasing actions; review of site assessment, construction, and operation plans; and consultation with state and local governments, Federal agencies, and other stakeholders.

**Environmental Programs.**—Informs decision-makers and the public about the potential impacts of OCS energy and mineral activities on the marine, coastal, and human environment. Develops the environmental impact statements and environmental assessments needed to consider the potential environmental impacts of proposed actions in accordance with the National Environmental Protection Act, the OCS Lands Act, and numerous other environmental statutes, regulations, and executive orders. Funding supports scientific research needed to inform policy decisions regarding energy and mineral development on the OCS.

**Marine Minerals.**—Manages non-energy minerals on the OCS and conveys, on a noncompetitive basis, the rights to those resources to federal, state, and local government agencies for shore protection, beach or coastal wetlands restoration projects, or for use in construction projects funded or authorized by the Federal Government. Funding supports assessments of exploration and leasing activities, coordination with governmental partners, engagement of stakeholders, strategic planning, and mission-focused scientific research to improve decision making and risk management.

**Executive Direction.**—Funds bureau-wide leadership, direction, management, coordination, communication strategies, and outreach. This includes budget management, administrative services management, bureau-wide information technology management and governance, congressional and public affairs, program policy and analysis, international affairs, and Freedom of Information Act activities.

The Bureau of Safety and Environmental Enforcement (BSEE) was established on October 1, 2011, to ensure the safe and environmentally-sustainable exploration, development, and production of the Nation's offshore energy resources. The Bureau continues to mature its mission processes and staff capabilities to keep pace with the continued innovation in Outer Continental Shelf (OCS) exploration and production operations for oil and gas on the U.S. OCS. To fulfill its mission and advance American energy security, BSEE is committed to the continual advancement of the effectiveness of its inspection program, enhancing its permitting processes, ensuring high levels of preparedness in the event of oil spills, the expansion of the renewables program, and reforming regulations. The Offshore Safety and Environmental Enforcement (OSEE) account is BSEE's primary operating account and funds the following activities: Operations, Safety, and Regulation; Environmental Enforcement; Administrative Operations; and Executive Direction.

**Operations, Safety, and Regulation.**—Funds OCS permit application reviews; inspections of OCS facilities, including critical high-risk activities; offshore operator oil spill planning and preparedness compliance; investigations; enforcement; audit programs; annual operator performance reviews; verification of oil and gas production levels to help ensure the public receives a fair return; research supporting the analysis of emerging technologies, standards and regulatory review activities; and technical training.

**Environmental Enforcement.**—Funds compliance staff supporting permit reviewers by evaluating and identifying environmental mitigation provisions that can be incorporated into permits; specialized inspections of air, water, and mitigation measures; and subject matter expertise training for safety inspectors to assist in identifying environmental violations.

**Administrative Operations.**—Funds general administration and ethics programs, equal employment opportunity services, emergency management, finance, human resources, procurement, and information management. This activity also provides a full range of administrative and information management services to the Bureau of Ocean Energy Management (BOEM) and other entities within the Department on a reimbursable basis.

**Executive Direction.**—Funds bureau-wide leadership, direction, management, coordination, communications strategies, and outreach. This includes functions such as budget, congressional and public affairs, and policy analysis.

REGULATION AND TECHNOLOGY—Continued

*Environmental protection.*—This activity funds functions that directly contribute to ensuring the environment is protected during surface coal mining operations. It also addresses activities to ensure coal operators adequately reclaim the land after mining is completed.

Under this activity, the Office of Surface Mining Reclamation and Enforcement provides grants and support to States to operate enforcement programs on State and private lands under the terms of the Surface Mining Control and Reclamation Act of 1977. This activity also provides for the operation of enforcement programs on Federal and Indian lands, as well as Federal oversight of these regulatory programs.

*Technology development and transfer.*—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides technical tools, such as the Coal Information Management System, to States and Indian Tribes to solve problems related to the environmental effects of coal mining and technical assistance to address specific coal mining issues.

*Financial management.*—This activity provides resources for managing, accounting, processing collections, and pursuing delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations. This activity also includes accounting for and reporting on grants awarded to States and Tribes for regulatory purposes.

*Executive direction and administration.*—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

*Environmental restoration.*—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. This activity provides discretionary funding for the Federal reclamation program for watershed restoration projects and for the evaluation of State and tribal reclamation programs that now receive mandatory funding for reclamation activities. This activity also provides for the operation of Federal reclamation programs for activities in those States without their own reclamation programs.

*Technology development and transfer.*—This activity provides funding to enhance the technical skills States and Indian Tribes need to operate their reclamation programs. The Office of Surface Mining Reclamation and Enforcement (OSMRE) provides technical assistance on mining and reclamation-related problems.

*Financial management.*—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. The OSMRE seeks to maximize voluntary compliance with the Surface Mining Control and Reclamation Act's reclamation fee provisions. This activity also includes accounting for and reporting on grants awarded to States and Tribes for reclamation activities.

*Executive direction and administration.*—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

Public Law 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans; unobligated balances in the Fund are used to generate interest for this purpose.

WATER AND SCIENCE

BUREAU OF RECLAMATION

Appropriations to Reclamation are made from the general fund and from certain special funds. Projects funded from the General Fund include the Colorado River Basin Project and the Colorado River Storage Project, among others. Special funds include the Reclamation Fund, the Central Valley Project Restoration Fund, the Colorado River Dam Fund, and the Recreation, Entrance, and User Fee account. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act.

Of the Bureau's special funds, the Reclamation Fund consists of repayments and other revenues from water and power users, receipts from the sale, lease, and rental of Federal lands, and certain oil and mineral revenues. It can finance program activities authorized under "Reclamation Law" that directly benefit the 17 Western States. The Central Valley Project Restoration Fund consists of revenues from project beneficiaries. The Colorado River Dam Fund generates revenue from the sale of Boulder Canyon power.

The Water and Related Resources account supports the development, management, and restoration of water and related resources in the 17 Western States. The account includes funds to operate, maintain, and rehabilitate existing water and power facilities; protect public safety; conduct studies on ways to improve the reliability of water and related resources; and cover expenses associated with Indian water rights settlements.

Work is done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies.

This account receives funding (user fees and repayment receipts) from the Friant Division long-term water contractors and other Federal and non-Federal sources to implement the provisions described in the Settlement (Settlement) for the National Resources Defense Council et al. v. Rodgers lawsuit. The Settlement's two primary goals are: 1) to restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) to reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The Utah Reclamation Mitigation and Conservation account was established under Title IV of Public Law 102-575 to reflect contributions from the State of Utah, the Federal Government (through the Secretary of the Interior and the Western Area Power Administration), and project benefi-

ciaries (the Conservancy District). The requirement for contributions from the State, the Secretary, and the Conservancy District ended in 2001. The requirement for contributions from the Western Area Power Administration ended in 2013. Funds are deposited into the account as principal and may not be expended for any purpose. Interest earned annually on the account is available for expenditure, without further appropriations, by the Utah Reclamation Mitigation and Conservation Commission which has the option to use the funds for the mitigation, conservation, and enhancement of fish and wildlife and recreational resources, or to reinvest the funds into the account as principal.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of the Department of the Interior (Interior) and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and natural resource issues, including the water, land, geologic, and biological resources of the Nation. The USGS budget continues science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation and engages in partnerships with universities, research institutions, and major public and private laboratories.

*Ecosystems.*—The USGS Ecosystems mission area provides scientific information needed by Interior for sound management of trust lands and species; studies and predicts the consequences of environmental change and the effects of alternative management actions to those lands and species; provides science focused on understanding impacts of and adaptation to climate change and other stressors to the Nation's resources; and develops information and tools to evaluate risk and control the spread of economically and ecologically harmful invasive species and wildlife diseases.

*Energy and Mineral Resources.*—The USGS Energy and Mineral Resources mission area conducts scientific research on the location, quantity, and quality of the Nation's and the world's energy and mineral resources. The mission area provides valuable science to better understand the Nation's mineral and energy resource potential, supply, production, consumption and impacts of development. Accurate scientific information about America's energy and mineral resources is critical, as our Nation depends on energy to power our homes and businesses and minerals to manufacture products we rely on every day, from our cell phones and laptops to the cars we drive. The science provided by the mission area is used to inform strategic, evidence-based economic and geopolitical decisions and facilitates responsible natural resource development.

*Natural Hazards.*—The USGS plays a critical role in providing policy-makers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for achieving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, geomagnetic storms, tsunamis, and wildfires. The USGS Natural Hazards mission area is working with its partners and stakeholders to define and mitigate risks, build understanding of natural hazard processes, and characterize the potential impact and consequences on human activity, health, the economy, and the environment. This mission area includes USGS activities that characterize and assess coastal and marine processes, conditions, change and vulnerability.

*Water Resources.*—The USGS is the primary Federal science agency providing information about water resources. To fulfill this responsibility, the USGS Water Resources mission area monitors and assesses the amount and characteristics of the Nation's water resources, assesses sources and behavior of contaminants in the water environment, and develops tools to improve management and understanding of water resources. This work supports Federal, State, tribal, and local government decisions in managing water resources for domestic, agricultural, commercial, industrial, recreational, and ecological uses; protecting and enhancing water resources for human health, aquatic health, and environmental quality; minimizing loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributing to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

*Core Science Systems.*—The USGS Core Science Systems mission area leads the bureau's mission as the civilian mapping agency for the Nation—a 139-year legacy since its establishment in 1879. The USGS conducts detailed surveys and distributes the resulting high-quality and highly-accurate topographic, geologic, hydrographic, and biogeographic maps and remotely-sensed data to the public. Mapping accuracy enabled by cutting-edge technologies allows precise planning for recreational use on public lands; collaborative conservation with Interior partners; critical minerals assessments; energy development; transportation and pipeline infrastructure projects; urban planning and development; land change and flood prediction at regional, local, and neighborhood scales; emergency response; and hazards mitigation. The USGS Core Science Systems Mission Area is the Federal steward of this high-quality geospatial data, and provides access to the public through The National Map, the National Land Cover Database, the National Geologic Map Database, the USGS Earth Explorer, and the National Biogeographic Map. The USGS also operates the Landsat satellites and data systems, necessary to understand, monitor and detect changes that affect the Nation's natural and agricultural resources, economy, public safety and national security, and historical heritage.

SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

**Science Support.**—The USGS Science Support program funds essential science leadership as well as critical functions such as: scientific integrity processes; sharing and communicating science findings; purchasing science equipment and field supplies; executing science agreements with partners; contracting for support scientists and researchers; safety training; hazardous waste management; succession planning and execution; and information technology, which supports the scientific process and information management of scientific data. Science Support also provides Bureau-wide executive direction and coordination, business administration and financial management.

**Facilities.**—The USGS Facilities program provides safe, functional workspace, laboratories, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties and deferred maintenance and capital improvement for owned assets.

**Reimbursable Program.**—This program includes reimbursements from non-Federal sources (States, Tribes, and municipalities) for: cooperative efforts; proceeds from the sale of copies of photographs and records and the sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. The USGS also receives reimbursements from other Federal agencies for mission-related work performed at the request of the financing agency.

**Ecological Services.**—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species listed under the Endangered Species Act and work toward making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize potential conflicts between development projects and imperiled species.

**Habitat Conservation.**—Through technical and financial assistance, the Service promotes the protection, conservation, and restoration of the Nation's fish and wildlife resources. These conservation activities are accom-

plished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the Nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

**National Wildlife Refuge System.**—The Service maintains the National Wildlife Refuge System consisting of 567 refuges, waterfowl production areas in 210 counties managed by 38 wetland management districts, 50 wildlife coordination areas, and seven national monuments. The National Wildlife Refuge System administers this network of land and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

**Conservation and Enforcement.**—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with domestic and international partners to promote a coordinated strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

**Fish and Aquatic Conservation.**—The Fish and Aquatic Conservation Program consists of a network of 70 National Fish Hatcheries, one historic National Fish Hatchery, nine Fish Health Centers, eight Fish Technology Centers, 51 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

**Cooperative Landscape Conservation.**—Through a national network of Landscape Conservation Cooperatives (LCCs), and in cooperation with both Federal and non-Federal partners, the Service enhances its core capacity to address adaptive management problems affecting fish, wildlife, and plants. The Budget does not include funding for this activity in 2020.

**Science Support.**—Science Support provides funding for applied science directed at high impact questions of concern to management of fish and wildlife resources. This science provides information to inform resource management decisions to best manage species at healthy and sustainable levels. The Budget does not include funding for this activity in 2020.

**General Operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories primarily through a formula-based apportionment. Additionally, a competitive program uses a merit-based process to fund outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. Tribes can also receive funds through a national competitive award process. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The U.S. Fish and Wildlife Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species, implementing the North American Waterfowl Management Plan, and conserving migratory birds of conservation concern. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders. To focus resources on caring for current Department of Interior lands, the 2020 Budget does not include funding for new land acquisition projects and proposes a partial cancellation of prior year balances.

The Landowner Incentive Program provided cost-shared, competitive grants to States, Commonwealths, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provided technical and financial assistance to private landowners to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008 and minimal balances remain in this account.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of U.S. Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, also known as Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The Federal Duck Stamp Act (P.L. 113-264) increased the price of Duck Stamps from \$15 to \$25, with the \$10 increase to be dedicated to the acquisition of conservation easements for conservation of migratory birds.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the

NORTH AMERICAN WETLANDS CONSERVATION FUND—Continued

Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include obtaining a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. Territories for species and habitat conservation actions on non-Federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed or are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account have been financed by both the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the two accounts are subject to annual appropriations authorized by the Congress. Funding for this program is not proposed in the 2020 request and a partial cancellation of prior year balances is proposed.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Fish and Wildlife Service fee lands are located, from the revenues resulting from the sale of products from Service lands, less expenses for producing the revenue and activities related to revenue sharing. The 2020 Budget does not propose to supplement revenues with discretionary funding.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 164 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Service sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. The Administration proposes a two-year extension of FLREA in appropriations language and legislation to reauthorize this authority currently set to expire on September 30, 2020.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), also known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Energy Policy Act (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed each year to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In 2011, administration of this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, also known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106–408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses for the Fish and Wildlife Service and the United States Coast Guard, special commissions, and the Boating Council, be distributed to support the following:

*The Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. 3951 et seq.)*.—18.673 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the U.S. Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

*Boating Safety Programs.*—17.315 percent of net deposits are to be made available to the United States Coast Guard for State recreational boating safety programs.

*Boating Infrastructure Improvement.*—Four percent of net deposits are to be made available to the Secretary of the Interior to make grants to 1) States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer, or 2) States, Commonwealths, the District of Columbia and Territories, as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage. Not more than 75 percent of the four percent shall be available for grants under either of the award processes referenced in this paragraph.

*National Outreach and Communications Programs.*—Two percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

*Grants to States.*—58.012 percent of net deposits are provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use and \$3 million is reserved for Multistate Conservation Activities.

The National Park Service administers 418 units and over 85 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. This annual appropriation funds the operation of areas and facilities administered under the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of repair and rehabilitation funds and funds for the cooperative restoration of the Everglades, which are available for two years. The 2020 Budget proposes that the full appropriation also be made available for two years. In addition, this account contains reimbursable activity such as recovery of costs associated with special use permits.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

*Resource stewardship.*—Encompasses resource management operations that provide for the protection and preservation of unique natural, cultural, and historical features of units of the National Park System.

*Visitor services.*—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of commercial services for the benefit of visitors and the protection of resources.

*Park protection.*—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, safety, and public health operations.

*Facility operations and maintenance.*—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

*Park support.*—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

Centennial Challenge funds are used to complete projects with partner donations. All Federal funds must be matched on a 50/50 basis, derived from non-Federal sources in the form of cash, assets, or a pledge of donation guaranteed by an irrevocable letter of credit. Projects are administered under existing National Park Service partnership authorities. No funding is requested for this program in 2020. The National Park Service Centennial Act (P.L. 114-289) established a National Park Centennial Challenge Fund for signature projects and programs related to visitor services facilities and trail maintenance, funded through offsetting collections exceeding \$10 million from America the Beautiful Senior Pass.

The National Recreation and Preservation appropriation covers a broad range of activities relating to outdoor recreation planning, preservation of natural, cultural and historic resources, and environmental compliance. These programs provide a central point at the Federal level for recreation and preservation planning; the coordination of Federal and State policies, procedures and guidelines; and the administration of technical and financial assistance to international, Federal, State, and local governments and private organizations. The 2020 Budget proposes that the appropriation be made available for two years. This appropriation is comprised of the following six budget activities:

**Natural Programs.**—Increases river and trail opportunities through Rivers, Trails, and Conservation Assistance, State and local technical assistance and Chesapeake Bay Gateways and Water Trails grants; creates river con-

servation and recreational opportunities that are compatible with continuing and future operations of hydropower facilities, fulfills National Park Service responsibilities under the Federal Power Act, and protects park resources through the Hydropower Recreation Assistance Program; manages the National Natural Landmark program; and provides technical assistance to State and local governments and transfers surplus real property to local governments for recreation uses. The 2020 Budget does not request funding for Chesapeake Bay Gateways and Water Trails grants.

**Cultural Programs.**—Manages the National Register of Historic Places; reviews and certifies applications for Federal Tax Credits for Historic Preservation as a reimbursable activity; conducts cultural resources management planning through the National Historic Landmarks program, the Historic American Buildings Survey, the Historic American Engineering Record and the Historic American Landscapes Survey programs; and advances the application of science and technology in historic preservation and provides information distribution and skills training in the preservation and conservation of the Nation's significant historic and cultural resources through the National Center for Preservation Technology and Training. This program activity also supports the American Battlefield Protection Program Assistance Grants program, the Japanese American Confinement Site Grants program, the Native American Graves Protection and Repatriation Grants program, and the American Indian and Native Hawaiian Art & Culture Grants. The 2020 Budget does not request funding for these grants. Grant administration is proposed for transfer to this activity in the 2020 Budget.

**Environmental Compliance and Review.**—Provides review and commentary on environmental impact statements, Federal licensing, permit applications, and other actions that may impact areas of National Park Service jurisdiction.

**Grants Administration.**—Provides administrative expenses associated with the Historic Preservation Fund grant programs, the Native American Graves Protection and Repatriation Grants program, the Japanese American Confinement Sites Grants, and the American Battlefield Protection Program Assistance Grants. The 2020 Budget proposes to transfer Grants Administration from its own activity to the Cultural Programs activity as a separate program component.

**International Park Affairs.**—Coordinates international assistance programs and the exchange and support functions that complement the Service's domestic role.

**Heritage Partnership Programs.**—Provides financial and technical assistance to Congressionally designated national heritage areas, managed by private or State organizations to promote the conservation of natural, historic, scenic, and cultural resources. The 2020 Budget does not request funding for financial assistance for this program.

The Construction appropriation provides support to several National Park Service mission goals, including preserving park resources, providing for visitor enjoyment, and improving organizational effectiveness. In addition, this account contains activity related to reimbursable agreements.

The Construction appropriation is composed of five budget activities: *Line item construction.*—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park.

*Special programs.*—This activity includes Emergency and Unscheduled Projects, Employee Housing, Dam Safety, and Equipment Replacement.

*Construction planning.*—This activity includes the project planning function to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

*Construction program management and operations.*—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

*Management planning.*—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding also is used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The appropriation is composed of the following budget activities:

**Acquisition Management.**—Provides for the administration of land acquisitions throughout the National Park System, ensuring compliance with existing guidelines and laws and provides for the administration of American Battlefield Protection Program Acquisition Grants.

**Federal land acquisition.**—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System. Funds are also used for matching grants for the purchase of Revolutionary War, the War of 1812, and Civil War Battlefield lands by non-Federal entities. To focus resources on current Department of Interior lands, the 2020 Budget does not request funding for land acquisition projects and proposes a partial cancellation of prior year balances.

**State conservation grants administration.**—Provides for the administration of matching grants to States and through States to local governments, for the acquisition and development of public outdoor recreation areas and facilities. Appropriated funding for this program is not requested for 2020 in anticipation of estimated increases in the Gulf of Mexico Energy Security Act (GOMESA) lease revenue.

**State conservation grants.**—Provides matching grants to States and local units of government for the acquisition and development of land and facilities that provide the public access to new opportunities to engage in outdoor recreation. The program includes both traditional formula and competitive

grant programs for States. Appropriated funding for this program is not requested for 2020 in anticipation of estimated increases in GOMESA lease revenue.

The Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432) allows a portion of the revenue collected from certain oil and gas leases in the Gulf of Mexico Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Consolidated Appropriations Act, 2018 (P.L. 115–141) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

**Recreation Fee Program.**—The National Park Service (NPS) and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). Section 130 of Division C of the Department of Defense and Labor, Health and Human Services, and Education Appropriations Act, 2019 and Continuing Appropriations Act, 2019 (P.L. 115–245) extended FLREA through 2020. In the 2020 Budget, the Administration proposes appropriations language to extend the authorization for two years and supports reauthorization of the program.

Net proceeds are used for high-priority visitor service and facility maintenance projects throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Service-wide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108–447. The National Park Service Centennial Act (P.L. 114–289) established in the National Park Foundation, a Second Century Endowment for NPS projects and activities, funded through offsetting collections from the first \$10 million collected in each fiscal year, generated from the America the Beautiful Senior Pass.

**Deed-restricted parks fee program.**—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in

RECREATION FEE PERMANENT APPROPRIATIONS—Continued

accordance with Public Law 105–327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

*Transportation systems fund.*—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105–391.

*Payment for tax losses on land acquired for Grand Teton National Park.*—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d–3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, Indian Tribes, Historically Black Colleges and Universities, and the Save America's Treasures program. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. In addition to the traditional grants-in-aid described above, the account includes competitive grant programs. This includes grants for the survey and nomination of properties associated with communities currently under-represented in the National Register and as National Historic Landmarks, and grants to preserve the sites and stories of the Civil Rights Movement. Funding for grants-in-aid to Historically Black Colleges and Universities, Competitive Grants, Historic Revitalization Grants, and Save America's Treasures is not requested in the 2020 Budget.

*Park concessions franchise fees.*—Franchise fees for concessioner activities in the National Park System (NPS) are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105–391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations. The National Park Service Centennial Act (P.L. 114–289), establishes a new concessions contracting authority within NPS, which is described under the Visitor Experience Improvements Fund account.

*Concessions improvement accounts.*—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

*Park buildings lease and maintenance fund.*—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105–391.

*Operation and maintenance of quarters.*—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

*Filming and photography special use fees.*—The National Park Service is authorized to retain fees collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

*Contributions to U.S. Park Police annuity benefits.*—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85–157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

*Delaware Water Gap, Route 209 Operations.*—The Delaware Water Gap National Recreation Area Improvement Act, as amended by Public Law 115–101, directs the Department of the Interior to establish a fee and permit program for the use of Highway 209 by commercial vehicles. All fees received are set aside in a special account, and made available for the administration and enforcement of the program, including registering vehicles, issuing permits and vehicle identification stickers, and personnel costs.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided to federally-recognized Indian Tribes, Alaskan Native groups, and individual American Indians and Alaska Natives, to fulfill Federal trust and treaty responsibilities and support tribal self-determination and nation building.

This account covers expenses associated with the following activities:

**Tribal Government.**—This activity promotes the sovereignty of federally-recognized Tribes by supporting and assisting them in the development and maintenance of strong and stable governments capable of administering quality programs and developing economies. This activity also provides for the maintenance of Bureau of Indian Affairs (BIA) roads and bridges.

**Human services.**—This activity provides funding for social services, welfare assistance, and Indian child welfare. The objective of this activity is to improve the quality of life for individual Indians who live on or near

OPERATION OF INDIAN PROGRAMS—Continued

Indian reservations and to help protect children, the elderly, and disabled from abuse and neglect.

*Trust: Natural resources management.*—This activity provides for the management, development, and protection of Indian trust land and natural resource assets and related treaty rights. Natural resource programs in Indian Country include agriculture, forestry, water, fish, wildlife, and parks.

*Trust: Real estate.*—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

*Education.*—This activity is proposed to move to a separate account within the Bureau of Indian Education in 2020. The Bureau of Indian Education (BIE) funded elementary and secondary school operations, other education programs for elementary-aged Indian children, tribal post-secondary schools, scholarships and adult education programs, education program management, and operations and facilities maintenance. The BIE-funded schools include 169 elementary and secondary BIE- and tribally-run schools, 14 dormitories, two post-secondary schools, and operating grants to eligible tribal colleges and universities.

*Public safety and justice.*—This activity funds law enforcement activities in Indian Country in over 25 States. Programs under this activity include investigative, police, and detention services; tribal courts; fire protection; and facilities maintenance.

*Community and economic development.*—This activity promotes the economic vitality of American Indians and Alaska Natives through Job Placement and Training, Economic Development, and Community Development. This activity also provides assistance for renewable and conventional energy and hard mineral development for the economic benefit of the Tribes and individual Indian allottees.

*Executive direction and administrative services.*—This activity supports the management of finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of General Service Administration and direct rentals, and intra-governmental payments. Significant portions of Indian Affairs activities are executed under contracts or compacts with federally-recognized Tribes to run tribal and Federal programs. Funding also supports BIA or BIE oversight and technical assistance for these activities in the central and regional offices.

The 2020 Budget proposes to create a new Operation of Indian Education Programs account which includes all Bureau of Indian Education activities formerly funded in the Operation of Indian Programs account.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds are used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the Tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), the American Indian Probate Reform Act of 2004 (P.L. 108–374), and other authorities. No funding is requested in 2020 in this account. Implementation of the Individual Indian Money Account Litigation Settlement (P.L. 111–291, Title I) to address fractionation of Indian lands is in a separate account.

The Operation of Indian Education Programs appropriation consists of a wide range of education related services and benefits provided to federally-recognized Indian Tribes, Alaskan Native groups and eligible American Indian and Alaska Native students to fulfill Federal trust and treaty responsibilities.

This account covers expenses associated with the support of Bureau of Indian Education (BIE) funded elementary and secondary school operations, other education programs for Indian children, tribal post-secondary schools,

scholarships and adult education programs, education program management, and operations and facilities maintenance. The BIE-funded schools include 169 elementary and secondary BIE- and tribally-run schools, 14 dormitories, two post-secondary schools, and operating grants to eligible tribal colleges and universities.

To improve management and accountability, the 2020 Budget proposes to create a new Operation of Indian Education Programs account which includes all Bureau of Indian Education activities formerly funded in the Operation of Indian Programs account.

**ADMINISTRATIVE PROVISIONS**

The Bureau of Indian Affairs and the Bureau of Indian Education may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding Public Law 87-279 (25 U.S.C. 15), the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or the Bureau of Indian Education for central office oversight, Education Management and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs or the Bureau of Indian Education under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act as amended.

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs or the Bureau of Indian Education, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education or more than one grade to expand the elementary grade structure for the Bureau-funded schools with a K-2 grade structure on October 1, 1996. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the

Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: Provided, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction or other facilities-related costs for such assets that are not owned by the Bureau: Provided further, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects.

Funds made available within Operation of Indian Programs, Operation of Indian Education Programs, Construction, and Education Construction may be transferred between these accounts to implement an orderly transition to separate accounts, and execute requested adjustments in tribal priority allocations: Provided further, transferred funds must be reported to Congress quarterly.

**Public Lands Infrastructure Fund.**—The Departments of Interior and Agriculture manage an infrastructure asset portfolio with over \$18 billion in deferred maintenance, which includes structures, trails, roads, utility systems, and Bureau of Indian Education (BIE) schools. To address these needs, the Budget includes \$6.5 billion over five years for a Public Lands Infrastructure Fund. The Fund will support infrastructure improvements through an allocation of 70 percent for national parks, 10 percent for national forests, 10 percent for wildlife refuges, five percent for BIE schools, and five percent for lands managed by the Bureau of Land Management. The Fund will be supported by the deposit of 50 percent of all Federal energy development revenue that would otherwise be credited or deposited as miscellaneous receipts to the Treasury over the 2020–2024 period, subject to an annual limit of \$1.3 billion. Interior and Agriculture would prioritize projects, monitor implementation, and measure results. This investment will significantly improve many of America's most visible, visited, and treasured places.

Under the Mineral Leasing Act (MLA), States receive fifty-percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State. (Separate statutes cover revenue sharing payments from the National Petroleum Reserve-Alaska and the 1002 Area of the Arctic National Wildlife Refuge, where the traditional MLA fifty-percent state share applies.) To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act permanently amended the MLA to deduct two percent from the required payments to States under the Act. These payments are administered by Interior's Office of Natural Resources Revenue.

Flood control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.), which provides that 75 percent of revenue collected is to be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by Interior's Office of Natural Resources Revenue.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have

been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are administered by Interior's Office of Natural Resources Revenue.

*Repeal geothermal payments to counties.*—The Budget proposes legislation to repeal section 224(b) of the Energy Policy Act of 2005, and permanently discontinue the 25 percent geothermal lease revenue sharing payments to counties. The legislation proposes to restore the traditional 50/50 Federal-State revenue sharing arrangement. This proposal is estimated to generate savings to the U.S. Treasury of \$40 million over ten years.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account are being used to improve basic economic information and financial management capabilities in the insular areas; address compact impact related issues; and also for brown tree snake control.

The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003 (P.L. 108-188), continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as Public Law 99-658, and was implemented on October 1, 1994. Financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, however, under the 2010 Compact Review Agreement (CRA) the United States agreed to provide continued economic assistance to the Government of Palau through 2024.

*Executive Direction.*—This activity supports Office of the Special Trustee (OST) for American Indians and staff office responsibilities and authorities for Indian trust fund management. Additionally, pursuant to the American Indian Trust Fund Management Reform Act of 1994, the Special Trustee for American Indians oversees Indian trust reform efforts department-wide.

*Program Operations, and Support.*—This activity supports the management and investment of approximately \$5 billion held in trust for Indian Tribes and individual Indians. Responsibilities include accurate and timely posting of collections, investment and disbursement of funds, and provision of timely financial information to Indian Tribes and individual Indian money account holders. Resources also support the implementation of trust management reform efforts, including historical trust accounting.

To enhance and consolidate services to Indian Tribes, individual American Indians, and Alaska Natives, the 2020 Budget proposes to change the reporting relationship of OST from the Office of The Secretary to the Assistant Secretary—Indian Affairs.

The Tribal Special Fund includes the following accounts: Tribal Economic Recovery Fund which consists of the Three Affiliated Fort Berthold Trust Fund and the Standing Rock Trust Fund, Papago Cooperative Fund, Ute Tribe Trust Fund, Pyramid Lake Indian Reservation Trust Fund, San Luis Rey Water Authority Trust Fund, and Cochiti Wetfields. More detailed information on specific accounts is provided in the budget justification for the Office of the Special Trustee for American Indians.

Tribal trust funds are deposited into a consolidated account in the U.S. Department of the Treasury pursuant to: 1) general or specific acts of the Congress and 2) Federal management of tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to respective tribal groups for various purposes, under various acts of the Congress, and may be subject to the provisions of tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

INDIAN EDUCATION SCHOLARSHIP HOLDING FUND

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established this Fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests would be quite low in many cases. Program contributions reached the maximum of \$60 million in 2017 and were transferred from the Trust Land Consolidation Fund to this Fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the settlement agreement. The 2020 Budget proposes to shift this account to the Office of the Special Trustee from the Office of the Secretary.

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established a new trust land consolidation Fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The Fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the Fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), and the American Indian Probate Reform Act of 2004 (P.L. 108–374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement. The 2020 Budget proposes to shift this account to the Office of the Special Trustee from the Office of the Secretary.

Public Law 94-565 (31 U.S.C. 6901-07), as amended, authorizes Payments in Lieu of Taxes ("PILT payments") to counties and other units of local government for lands within their boundaries administered by the Bureau of Land Management, the U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. The PILT payment formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

From the inception of the PILT program in 1977 through 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008-2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act (P.L. 112-141) extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113-79) extended the mandatory authorization through 2014. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113-235) extended PILT payment authority through 2015 with a combination of discretionary and mandatory funds. The Consolidated Appropriations Act of 2016 (P.L. 114-113) provided discretionary PILT funding within the

Office of the Secretary, Departmental Operations account to extend payment authority through 2016. The Consolidated Appropriations Act, 2017 (P.L. 115-31) provided discretionary PILT funding within Department-wide Programs. The Consolidated Appropriations Act, 2018 (P.L. 115-141) provided a mandatory funding stream for PILT at the full authorization levels to extend payment authority through 2018. The 2020 Budget continues to propose discretionary funding for PILT payments within Department-wide Programs.

The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. 9601 et seq.) requires responsible parties,

including Federal landowners, to investigate and clean up releases of hazardous substances. The Central Hazardous Materials Fund is used to fund remedial investigations and cleanup of hazardous waste sites for which the Department of the Interior is liable. The program also has authority to collect and retain amounts recovered from responsible parties within this account.

The 2020 Budget funds program management staff costs from annual discretionary appropriations and funds remedial investigations and cleanups using amounts recovered from responsible parties.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments are performed to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response,

NATURAL RESOURCE DAMAGE ASSESSMENT AND RESTORATION—Continued  
Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and the Act of July 27, 1990 (16 U.S.C. 19jj et seq.). Since 1992, amounts received by the United States and its State and tribal co-trustee partners from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The 2020 Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

**Preparedness.**—Funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence, and rural fire readiness, in which assistance is provided to local cooperators to enhance their capacity to protect remote communities and natural resources. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

**Suppression Operations.**—Funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Generally, emergency stabilization actions may be performed within one year of containment of a fire, however, exceptions to this time limit are allowed

under certain circumstances. In fiscal years 2010 through 2017, funding for the ten-year average of inflation-adjusted suppression obligations was split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The 2020 Budget request fully funds suppression operations at the ten-year average of suppression obligations as reported in the 2015 President's Budget, in accordance with the Consolidated Appropriations Act, 2018 (P.L. 115–141). The Act also amended the Balanced Budget and Emergency Deficit Control Act to provide additional new budget authority for fiscal years 2020 through 2027. Under this provision, in 2020, \$300 million of the \$2.25 billion made available by the Act will be provided to the Department of Interior (DOI) for wildfire suppression operations; the remaining \$1.95 billion will be provided to the Department of Agriculture's U.S. Forest Service in support of wildfire suppression operations. This additional new budget authority will help ensure that adequate resources are available to the Departments of the Interior and Agriculture to fight wildland fires, protect communities, and safeguard human life during the most severe wildland fire seasons. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

**Fuels Management.**—The fuels management program conducts treatments aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. This activity may also conduct treatments that improve the integrity and resilience of our forests and rangelands. The Fuels Management activity will contribute community adaption to fire and improve the ability to safely and appropriately respond to wildfire. Funding for the Fuels Management activity covers the planning, operational aspects, and monitoring of fuels treatments. The program will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods.

**Other Operations.**—Funds all other aspects of the wildland fire management program, which includes Fire Facilities Construction and Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fire Facilities Construction and Maintenance program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and fuels management activities. The 2020 Budget does not request funds for Fire Facilities Construction and Maintenance. Funds for these facilities may be included in the Department's fire-related bureaus' construction and deferred maintenance budgets. The Burned Area Rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years, or up to five years under certain circumstances, following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds the Department's share of the Joint Fire Science program, an interagency partnership that sponsors and delivers applied research to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics. The 2020 Budget does not include funding for the Joint Fire Science program.

In 2010 through 2017, amounts in the FLAME Fund included the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary is authorized to permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event DOI has exhausted its suppression resources due to an active fire season. Funds have not been appropriated to the FLAME account since 2017, and remaining FLAME balances were transferred to the Wildland Fire Management account in 2018.

The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the Interior Business Center (IBC). Activities financed through the fund include information technology and security, systems hosting and help desk services, Departmental news and information, aircraft services, central reproduction, supplies and health services, and safety and health initiatives. Departmental administrative systems hosted within the Fund include the Federal Personnel and Payroll System and the Financial and Business Management System (FBMS). The IBC provides financial management, acquisition, and human resources services as well as payroll services to other agencies as one of the Government-wide shared service providers selected by the Office of Personnel Management. Through the National Indian Program Training Center, a component of Department of Interior (DOI) University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal Government employees. The appropriated portion of the Working Capital Fund includes funding for FBMS operations and maintenance, and activities related to improving the Department's cybersecurity capabilities. The 2020 Budget proposes to include funding for DOI's implementation planning and transition activities in support of the payroll and Work Schedule and Leave Management (WSLM) modernization initiative entitled NewPay.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology (IT). Under the control of the Department of Justice (DOJ) Chief Information Officer (CIO), this centralized fund ensures that investments in information sharing technology are well-planned and aligned with the Department's overall IT strategy and enterprise architecture. The current major initiatives/projects are described below.

**Cybersecurity.**—Enhancing cybersecurity remains a top priority for the Department and its leadership as DOJ supports a wide range of missions that include national security, law enforcement, prosecution, and incarceration. For each of these critical missions, the systems that support them must be secured to protect the confidentiality of sensitive information, the availability of data and workflows crucial to mission execution, and the integrity of data guiding critical decision-making.

**IT Transformation.**—IT Transformation is a long-term, multiyear commitment that implements shared IT infrastructure for the Department and shifts investments to the most efficient computing platforms, including shared services and next generation storage, hosting, networking, and facilities. This directly supports the Federal CIO's 25 Point Plan to Reform Federal IT Management and the Portfolio Stat process, and aligns the De-

partment's IT operations with the Federal Data Center Consolidation and Shared First initiatives. Work on these initiatives began in 2012, and consists of the following projects: a) e-mail consolidation; b) data center consolidation; c) mobility and remote access; and d) desktops. In 2020, DOJ will continue to leverage Schedule A hiring authority with a goal of bringing on board private sector IT subject matter experts to progress IT transformation already underway within the Department's Office of the CIO (OCIO). These experts, with varied skill sets from data architects, application hosting, and business intelligence, will assist OCIO and component customers in moving forward on respective IT initiatives in support of the DOJ mission. Additionally, the OCIO will leverage U.S. Digital Service expertise in its effort to drive innovation in key IT management areas, such as with Digital Acquisition Innovation Labs. OCIO will also continue to leverage its authority under the Federal Information Technology Acquisition Reform Act (FITARA), through the Department's IT Investment Review Council (DIRC) and Investment Review Board (IRB), and through the TechStat process, to ensure that all Department IT projects and initiatives are meeting expected milestones and remain within project scope and budget.

**Policy, Planning and Oversight.**—JIST funds the Office of the CIO and the Policy & Planning Staff (PPS), which supports CIO management in complying with the Clinger-Cohen Act, the FITARA, and other applicable laws, rules, and regulations for federal information resource management. Within OCIO, PPS develops, implements, and oversees an integrated approach for effectively and efficiently planning and managing DOJ's information technology resources, including the creation of operational plans for JIST and monitoring the execution of funds against those plans. PPS is responsible for IT investment management including portfolio, program, and project management. The investment management team manages the Department's IT investment and budget planning processes; develops and maintains the Department's general IT program policy and guidance documents; and coordinates the activities of the DIRB DIRC. In addition, PPS performs reviews to examine planned IT acquisitions and procurements to ensure alignment with the Department's IT strategies, policies, and its enterprise road map.

The Executive Office for Immigration Review (EOIR) was created on January 9, 1983 through an internal Department of Justice (DOJ) reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. In addition to establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of Federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees 61 Immigration Courts nationwide, the BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards

arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. By statute, the OIG also reports to the Attorney General, the Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decision makers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and the Congress, and of vital importance to the Department.

The Office of the General Counsel provides legal advice to OIG management and staff. It also drafts memoranda on issues of law; prepares administrative subpoenas; represents the OIG in personnel, contractual, ethical, and legal matters; and responds to Freedom of Information Act requests.

The Management and Planning function provides advice to OIG senior leadership on administrative and fiscal policy, and assists OIG components in the areas of budget formulation and execution, security, personnel, training, travel, procurement, property management, information technology, computer network communications, telecommunications, records management, quality assurance, internal controls, and general support.

The United States Parole Commission is responsible for 1) making parole release and revocation decisions for all parole-eligible Federal and District of Columbia Code offenders; 2) setting and enforcing the conditions of supervised release for District of Columbia Code offenders; 3) making release decisions for United States citizens convicted of a crime in another country who voluntarily return to the United States for service of sentence; 4) performing parole-related functions for certain military and State offenders; and 5) exercising decision-making authority over State offenders who are on the State probation or parole, and are transferred to Federal authorities under the witness security program.

The Parole Commission works to reduce offender recidivism rates by implementing new revocation guidelines and establishing alternatives to incarceration for low-risk, non-violent offenders. In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective offender supervision program through U.S. and District of Columbia probation officers, and through research studies that evaluate the effectiveness of offender supervision programs. The Parole Commission has oversight responsibility for the supervision of District of Columbia parolees and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105–33).

The following Department legal activities are financed from this appropriation:

**Supreme Court proceedings and appellate matters.**—The Office of the Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower Federal courts, and supervises the handling of litigation in the Federal appellate courts.

**General tax matters.**—The mission of the Tax Division is to enforce the nation's tax laws fully, fairly, and consistently, through both criminal and civil litigation, in order to promote voluntary compliance with the tax laws, maintain public confidence in the integrity of the tax system, and promote the sound development of the law.

**Criminal matters.**—The Criminal Division develops, enforces, and supervises the application of all Federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

**Claims, customs, and general civil matters.**—The Civil Division represents the Federal Government in civil litigation to defend Federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic,

health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to Federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

**Environment and natural resource matters.**—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, worker safety, animal welfare, and the acquisition of Federal property.

**Legal opinions.**—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the executive branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

**Civil rights matters.**—This program enforces the Nation's Federal civil rights laws. Through the enforcement of a wide range of anti-discrimination laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional rights of all individuals, particularly some of the most vulnerable members of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations. The 2020 Budget is not requesting an appropriation for the Community Relations Service (CRS), and instead proposes to consolidate those functions within the Civil Rights Division (CRT). This consolidation would appropriately rightsize the Federal role in local conflict resolutions, while eliminating duplicative functions and improving efficiency. The Budget transfers \$5 million and 15 positions to CRT to support this proposal.

**INTERPOL Washington.**—This program is the United States National Central Bureau and designated representative to INTERPOL on behalf of the Attorney General. Its mission includes, but is not limited to, facilitating international police cooperation; transmitting criminal justice, humanitarian, and other law enforcement related information between U.S. law enforcement authorities and their foreign counterparts; and coordinating and integrating information for investigations of an international nature.

**Office of The Pardon Attorney.**—The Office of the Pardon Attorney (OPA) receives and evaluates clemency petitions for federal crimes and prepares letters of advice for the President for each application with approval from the Deputy Attorney General. In addition, OPA responds to inquiries concerning executive clemency petitions and the clemency process from applicants, their legal representatives, members of the public, and Members of Congress; prepares all necessary documents to effect the President's decision to grant or deny clemency; and provides advisory services to White House Counsel concerning executive clemency procedures.

**Reimbursable programs.**—This reflects reimbursable funding for the following:

**Civil Division.**—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

**Criminal Division.**—For activities related to healthcare fraud and drug prosecutions, international training programs, and asset forfeiture related activities;

**Environment and Natural Resources Division.**—From numerous client agencies for personnel, automated litigation support, and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency for Superfund enforcement litigation; and,

**Civil Rights Division.**—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Department of Justice Antitrust Division and the Federal Trade Commission (FTC) are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino fees, are collected by the FTC and split evenly between the two agencies. In 2020, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs.

The Federal Government is represented by a United States Marshal in each of the 94 judicial districts. The primary mission of the United States Marshals Service (USMS) is to protect, defend, and enforce the American justice system by securing Federal court facilities and ensuring the safety of judges and other court personnel; apprehending fugitives and non-compliant sex offenders; exercising custody of Federal prisoners, and providing for their security and transportation from arrest to incarceration; ensuring the safety of protected government witnesses and their families; executing Federal warrants and court orders; managing seized assets acquired through illegal means; and providing custody, management, and disposal of forfeited assets. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

Other Federal funds are derived from the Administrative Office of the U.S. Courts for the Judicial Facility Security Program, the Assets Forfeiture Fund for seized assets management and disposal, the Fees and Expenses of Witnesses appropriation for protected witnesses' security and relocation, the Organized Crime Drug Enforcement Task Forces Program for multi-agency drug investigations, and the Department of Education and the Centers for Disease Control for security services. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

For FY 2020, USMS requests \$8 million to provide additional Deputy U.S. Marshals to manage increased workload and enhance its capacity to effectively address Departmental priorities related to violent crime reduction across its core missions. In addition, USMS requests \$6.1 million to upgrade its fugitive apprehension aviation program and enable USMS to maintain operational capability for missions that require specialized airborne surveillance. USMS requests \$1 million to evaluate protection requirements for civilian Cabinet and sub-Cabinet level officials in support of the President's 2018 Government Reform and Reorganization Plan.

The Federal Prisoner Detention (FPD) account is responsible for the costs associated with the care of Federal detainees in the custody of the United States Marshals Service (USMS). The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD account provides for the care of Federal detainees in private, State, and local facilities, which includes housing, subsistence, transportation, medical care, and medical guard service.

For 2020, FPD requests \$330.5 million for housing, medical, and transportation costs associated with the projected USMS detention population. The Federal Government utilizes various methods to house detainees. Detention bed space for Federal detainees is acquired to maximize efficiency and effectiveness for the Government through: 1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility (funded in the Federal Bureau of Prisons' (BOP) account); 2) Intergovernmental Agreements with State and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and 3) Private performance-based contract facilities, where a daily rate is paid. Over three-quarters of the USMS's federally detained population will likely be housed in State, local, and private facilities.

The USMS continues to look for efficiencies and cost reductions through process and infrastructure improvements. The costs associated with these efforts are funded from the FPD account. The USMS has successfully implemented efficiencies in several areas including: eDesignate, which was developed to provide a more efficient workflow between the U.S. Courts, the USMS, and the BOP; core-rate IGA, which standardizes the pricing strategy for paying for non-federal detention space in order to control costs; the Quality Assurance Review Program, which ensures non-federal facilities' housing meet Department of Justice requirements for safe, secure and humane confinement; and increased use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pretrial detention, such as electronic monitoring, halfway house placement, and drug testing and treatment. The USMS will continue to identify issues and develop solutions to drive further efficiencies.

The Community Relations Service provides assistance to State and local communities in the prevention and resolution of tension, violence, and civil disorders relating to actual or perceived discrimination on the basis of race, color, or national origin. The Service also works with communities to employ strategies to prevent and respond to violent hate crimes committed on the basis of actual or perceived race, color, national origin, gender, gender identity, sexual orientation, religion, or disability. The 2020 Budget is not requesting an appropriation for the Community Relations Service (CRS), and instead proposes to consolidate those functions within the Civil Rights Division (CRT). This consolidation would appropriately rightsize the Federal role in local conflict resolutions, while eliminating duplicative functions and improving efficiency. The Budget transfers \$5 million and 15 positions to CRT to support this proposal.

Title II of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111-347) reopened the September 11th Victim Compensation Fund (VCF), extending eligibility for compensation associated with physical harm stemming from debris removal and extending the deadline for claims associated with harms not discovered before the Fund's original deadline. The VCF was established by the Air Transportation Safety and System Stabilization Act (P.L. 107-42) as an alternative to litigation, and had terminated operations in 2004 after making compensation payments of more than \$7 billion to survivors of 2,880 persons killed in the September 11, 2001 terrorist attacks and to 2,680 individuals who were injured in the attacks and subsequent rescue efforts.

The James Zadroga 9/11 Health and Compensation Act of 2010 reopened the VCF and made \$2.775 billion available for the settlement of claim determinations issued on or before December 17, 2015. After all claims in this group were resolved, roughly all remaining funds (\$813 million) became available in the new Victims Compensation Fund. The Victims Compensation Fund is available for the settlement of claim determinations issued after December 17, 2015.

Public Law 114-113 provided \$4.6 billion starting in 2017 for the settlement of claims related to the September 11th attacks. Per Section 410, a new Treasury account was established called the "Victims Compensation Fund." This new fund is available for the settlement of claim determinations issued after December 17, 2015. After all claims in the September 11th Victim Compensation Fund were resolved, \$813 million in remaining funding became available in the new Victims Compensation Fund.

United States Trustee System Fund.—The United States Trustees supervise the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts, and litigate against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99-554) expanded the pilot trustee program to a 21 region, nationwide program encompassing 88 judicial districts. (Bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts.) The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (Public Law 109-8) expanded the United States Trustees' existing responsibilities to include, among other things, means testing, credit counseling/debtor education, and debtor audits. User fees that are assessed offset the annual appropriation. In October 2017, the Bankruptcy Judgeship Act of 2017 (Public Law 115-72) was enacted which adjusted quarterly fees for the largest chapter 11 debtors. The amended fee structure was effective January 1, 2018 and applies for each fiscal year through 2022. The fee schedule, however, will revert to the prior schedule for any fiscal year in which the balance of the Fund equals or exceeds \$200 million as of the end of the prior fiscal year. As a result, the United States Trustee Program's 2020 appropriation is anticipated to be fully offset by bankruptcy fees collected and on deposit in the United States Trustee System Fund if the amended fee structure is in effect for that year.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department of Justice in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise, or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Justice Prisoner and Alien Transportation System (JPATS) is responsible for transporting the majority of Federal prisoners and detainees in the custody of the United States Marshals Service or the Bureau of Prisons. JPATS transports both sentenced and pretrial prisoners and detainees via coordinated air and ground systems without sacrificing the safety of the public, Federal employees, or those in custody. JPATS also transports prisoners and detainees on a reimbursable space-available basis for the Department of Defense and other participating executive departments as well as State and local agencies. Customers are billed based on the number of flight hours and the number of seats used to move their prisoners.

The Interagency Crime and Drug Enforcement (ICDE) account primarily funds the Organized Crime Drug Enforcement Task Forces (OCDETF) Program. OCDETF combines the resources and expertise of its 11 Federal law enforcement agency members—in cooperation with the Department of Justice's Criminal Division, United States Attorneys' Offices, and State and local law enforcement—to identify, disrupt, and dismantle the major domestic and transnational criminal organizations (TCO) that engage in the drug trafficking, violence, and money laundering activities that threaten

the public safety and economic and national security of the United States. The OCDETF Program performs the following activities:

**Investigation.**—This activity includes resources for the direct investigative, intelligence, and support activities of OCDETF's multi-agency task forces, focusing on the disruption and dismantlement of major TCOs. This activity also includes resources for the OCDETF Fusion Center (OFC). The OFC is a multi-agency intelligence center which analyzes fused law enforcement financial and human intelligence information, and produces actionable intelligence for use by OCDETF member agencies to disrupt and dismantle major criminal organizations and their supporting financial structures. In addition, the OFC creates strategic intelligence products to enhance TCO threat analyses and support the national strategic efforts against transnational organized crime. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, U.S. Secret Service, U.S. Postal Inspection Service, and Homeland Security Investigations. OCDETF also maintains 12 co-located Strike Forces. The ICDE account also supports transnational organized crime investigations through the International Organized Crime Intelligence and Operations Center (IOC-2). IOC-2 is a multi-agency intelligence center with a mission to significantly disrupt and dismantle those international criminal organizations posing the greatest threat to the United States. Multiple Federal agencies participate in IOC-2 activities and related investigations.

**Prosecution.**—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle in their entirety those major transnational criminal organizations engaged in the highest levels of drug trafficking, violence, and money laundering by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys and the Department of Justice's Criminal Division.

For FY 2020, OCDETF requests \$2 million to bolster OCDETF's National Opioid Initiative, which directs operational funding to support federal agents and prosecutors handling the opioid investigations and prosecutions targeted at the nation's fastest-growing drug problem.

The mission of the Federal Bureau of Investigation (FBI) is to protect the American people and uphold the Constitution of the United States. The FBI's mission priorities are to:

- Protect the U.S. from terrorist attacks;
- Protect the U.S. against foreign intelligence operations and espionage;
- Protect the U.S. against cyber-based attacks and high-technology crimes;
- Combat public corruption at all levels;
- Protect civil rights;
- Combat domestic and transnational criminal organizations and enterprises;
- Combat major white-collar crime; and,

—Combat significant violent crime.

The foundation of the FBI's budget strategy is supported by the FBI's mission, vision, and strategic objectives. At the heart of the FBI's strategy is the vision statement: Ahead of the threat through leadership, agility, and integration. The FBI aims to be ahead of the threat in two different ways. First, the FBI's goal is to continuously evolve to anticipate and mitigate existing threats. Second, the FBI needs to be able to recognize and address threats that it has not yet seen.

The FBI is headed by a Director, who is appointed by the President and confirmed by the Senate. FBI Headquarters, located in Washington, DC, provides centralized operational, policy, and administrative support to FBI investigations. The FBI operates 56 field offices in major U.S. cities and 350 resident agencies (RAs) throughout the country. RAs are satellite offices that allow the FBI to maintain a presence in and serve local communities. The FBI also operates over 63 Legal Attaché offices and over 28 sub-offices in 75 foreign countries around the world. Additionally, there are several specialized facilities and analytical centers within the FBI that are located across the country, such as the Criminal Justice Information Services Division in Clarksburg, WV; the Terrorist Explosive Device Analytical Center and Hazardous Devices School in Huntsville, AL; and the FBI Academy and Laboratory at Quantico, VA.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs, and by other Federal agencies for certain intelligence and investigative services such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2020, the FBI is requesting a total of \$9.257 billion. Specifically, FBI requests \$70.5 million for Cyber resources to support the development of advanced technical capabilities and the implementation of a comprehensive, multi-pronged strategy to target malicious cyber actors that threaten global U.S. interests; \$18.3 million to address threats posed by foreign intelligence and the increased requirements relating to the Foreign Investment Risk Review Modernization Act (FIRREA); \$18.2 million to target Transnational Organized Crime, enhancing FBI's ability to disrupt and dismantle TOC networks by developing analytical and technical tools for the FBI's TOC program, which also supports the Joint Criminal Opioid Darknet Enforcement (J-CODE) initiative; \$17.2 million to enhance the capabilities of the FBI's Render Safe, Stabilization and Special Agent Bomb Technician (SABT) programs; \$16.6 million for the National Vetting Center to coordinate the efforts of federal agencies to vet people seeking to enter or remain within the United States; and, \$4.2 million for the National Instant Criminal Background Check System to maintain efforts addressing high volumes of firearms background checks.

The request also includes a \$60 million cancellation from, but not limited to, Criminal Justice Information Services surcharge balances.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact on drug availability in the United States. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply, including heroin. DEA also considers it a high priority to target the financial infrastructure of major drug trafficking organizations, and members of the financial community who facilitate the laundering of their proceeds. From the beginning of 2005 through 2016, DEA denied drug traffickers \$37.5 billion in revenue through the seizure of both assets and drugs, including \$4.1 billion in 2016. In addition to keeping drugs and

drug-related violence out of the United States, DEA plays a vital role in the areas of national and border security.

DEA has 226 domestic offices organized in 23 divisions throughout the United States. Internationally, DEA has 90 offices in 69 countries and is responsible for coordinating and pursuing U.S. drug investigations abroad. Federal, State, local, and international partnerships continue to play an important role in DEA's enforcement efforts. For nearly 43 years, DEA has led a task force program that today includes approximately 2,500 task force officers participating in over 200 task forces. DEA's Special Operations Division and the El Paso Intelligence Center are vital resources for Federal, State, and local law enforcement. Additionally, through the Office of National Security Intelligence, DEA ensures that national security information obtained in the course of conducting its drug law enforcement mission is expeditiously shared with the Intelligence Community.

DEA's activities are divided into three decision units:

**Domestic Enforcement.**—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug trafficking syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, domestic enforcement groups, State and local task forces, other Federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. DEA's objectives for Domestic Enforcement include:

- Identifying and targeting the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

- Systematically disrupting or dismantling targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

- Working with international offices to dismantle domestic organizations directly affiliated with Transnational Criminal Organizations (TCO).

**International Enforcement.**—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. DEA's objectives for International Enforcement include:

- Identifying and targeting the most significant international drug and chemical trafficking organizations;

- Disrupting and dismantling the networks, financial infrastructures, operations, and resource bases of targeted international drug and chemical trafficking organizations; and

- Preventing drug trafficking organizations from funding terrorist organizations and activities.

**State and Local Assistance.**—DEA provides clandestine laboratory training, and meets the hazardous waste cleanup needs of the U.S. law enforcement community. DEA supports State and local law enforcement with assistance and training so that State and local agencies can better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for American citizens. As a result, DEA's nationwide contracts, container program, and established training programs allow DEA to provide State and local clandestine lab cleanup and training assistance in a cost-effective manner.

For 2020, DEA requests \$11.7 million for Cyber Enforcement to bolster key DEA programs to combat highly sophisticated TCOs that use cyber capabilities to further their criminal enterprises; \$11.6 million to enhance agency programs and offices focused on targeting, disrupting, and dismantling TCOs known for supplying illicit substances to distributors and users in the United States; and, \$11.1 million to establish five new heroin enforcement groups in DEA Field Divisions that identify heroin/opioids as one of the top drug threats.

For 2020, the Budget proposes to transfer the High Intensity Drug Trafficking Areas program from the Office of National Drug Control Policy

to DEA to improve coordination of drug enforcement efforts among Federal, State, and local law enforcement agencies in the U.S.

The High Intensity Drug Trafficking Areas (HIDTA) program was established by the Anti-Drug Abuse Act of 1988, as amended, to provide assistance to Federal, State, local, and tribal law enforcement entities operating in those areas most adversely affected by drug trafficking. The HIDTA program provides resources to Federal, State, local, and tribal agencies in each HIDTA region to carry out activities that address the specific drug threats of that region. A central feature of the HIDTA program is the discretion granted to HIDTA Executive Boards to design and carry out activities that reflect the specific drug trafficking threats found in each HIDTA region. This discretion ensures that each HIDTA Executive Board can tailor its strategy and initiatives closely to local conditions and can respond quickly to changes in those conditions. Among the types of activities funded by the HIDTA program are: drug enforcement task forces comprised of multiple Federal, State, local, and tribal agencies designed to dismantle and disrupt drug trafficking organizations; multi-agency intelligence centers that provide drug intelligence to HIDTA initiatives and participating agencies; initiatives to establish or improve interoperability of communications and information systems between and among law enforcement agencies; and investments in technology infrastructure.

For 2020, the Budget proposes to transfer the HIDTA program from the Office of National Drug Control Policy to the Drug Enforcement Administration to improve coordination with the Department of Justice's other drug enforcement efforts.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration (DEA) under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. The registrant community, physicians, prescribers, and pharmacists, can be seen as the first line of defense against the opioid epidemic now facing the United States. The engagement and education of these community members can help in reducing the overprescribing of opioids and the prevention of

abuse and illicit use. Investigations conducted by the Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. DEA's objectives for diversion control include:

—Identifying and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cybercrime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

—Supporting the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support, and assistance from the regulated industry;

—Educating the public on the dangers of prescription drug abuse and proactive enforcement measures to combat emerging drug trends; and,

—Ensuring an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

The Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF) is the U.S. law enforcement Agency dedicated to protecting our Nation from the illicit use of firearms and explosives in violent crime and acts of terrorism. ATF protects our communities from violent criminals and criminal organizations by investigating and preventing the illegal use and trafficking of firearms, the illegal use and improper storage of explosives, acts of arson and bombings, and the illegal diversion of alcohol and tobacco products. ATF regulates the firearms and explosives industries from manufacture and/or importation through retail sale to ensure that Federal Firearms Licensees and Federal Explosives Licensees and permittees conduct business in compliance with all applicable laws and regulations. For 2020, ATF requests \$10.7 million for ATF's National Integrated Ballistics Information Network (NIBIN), \$4 million for the operation and maintenance of the Spartan case management system, \$3 million for network cybersecurity enhancements to improve the bandwidth capabilities of district offices, and \$3 million in one-time funds for capital equipment and repairs.

Additionally, the Budget proposes legislation to transfer primary jurisdiction over Federal tobacco and alcohol anti-smuggling laws from the Department of Justice and the ATF to the Department of the Treasury and the Alcohol and Tobacco Tax and Trade Bureau.

Federal Prison Industries, Inc. (FPI), was created by the Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified work program providing products and services to other Federal agencies. These operations are conducted in a self-sustaining manner so as to maximize meaningful inmate employment opportunities and minimize the effects of competition on

private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other Federal Departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in operating income or loss, which is reapplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary in the conduct of its industrial operation.

In order to increase inmate work opportunities, FPI continues to explore opportunities with commercial customers. In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112–55), FPI received two new authorities to increase inmate employment. The first enables FPI to recap- work that would otherwise be performed outside of the United States, also known as repatriation. The second authorized FPI to participate in the Prison Industries Enhancement Certification Program, which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

The 2020 Budget requests \$94.5 million for the Office of Justice Programs' (OJP) Research, Evaluation, and Statistics appropriation. This appropriation provides nationwide support for criminal justice professionals and decision-makers through programs that provide grants, contracts, and cooperative agreements for research, development, and evaluation, and support development and dissemination of quality and relevant statistical and scientific information. The information and technologies developed through OJP's research and statistical programs improve the efficiency and effectiveness of criminal justice programs at all levels of government.

**Research, Development, and Evaluation Program.**—The 2020 Budget proposes a total of \$46.5 million for the National Institute of Justice (NIJ) to support high-quality research, development, and evaluation in the forensic, social, and physical sciences. Of this funding, at least \$3 million will be dedicated to corrections-related research as part of the consolidation of activities of the National Institute of Corrections within OJP, and \$1.5 million will support the evaluation of the Second Chance Act, per the First Step Act of 2018.

**Criminal Justice Statistics Program.**—The 2020 Budget proposes \$48 million for the Bureau of Justice Statistics (BJS) to carryout national statistical collections supporting data-driven approaches to reduce and prevent crime and to assist state, local and tribal governments in enhancing their statistical capabilities, including improving criminal history records and information systems. Current programs provide statistics on: victimization, corrections, law enforcement, federal justice systems, prosecution and adjudication (courts), criminal histories and recidivism, and tribal communities.

**3% Research, Evaluation and Statistics Set Aside.**—The 2020 Budget requests a set-aside of up to three percent for research, evaluation, and statistics. The set-aside amount from OJP discretionary programs supports the base programs for NIJ and BJS.

**Management and Administration.**—The 2020 Budget proposes a total Management and Administration funding level of \$245 million for OJP. This funding level supports management and administration for OJP, including costs related to the consolidation of the Office of Community Oriented Policing Services and the National Institute of Corrections within OJP.

The 2020 Budget requests \$1.48 billion for the Office of Justice Programs' (OJP) State and Local Law Enforcement Assistance appropriation. State, local, and tribal law enforcement and criminal justice professionals are responsible for the majority of the Nation's day-to-day crime prevention and control activities. The programs supported by this account help OJP partners throughout the Nation prevent and reduce the incidence of violent crime; improve law enforcement officer safety and wellness; address drug-related crime and substance abuse, like opioids; and identify innovative solutions to crime- and justice system-related challenges. These programs include a combination of formula and discretionary grant programs, coupled with robust training and technical assistance activities designed to build and enhance the crime fighting and criminal justice capabilities of OJP's state, local, and tribal partners. Priority programs in the 2020 Budget will support law enforcement efforts to reduce violent crime, promote officer safety and wellness, combat the opioid epidemic, address the issue and impact of unsubmitted sexual assault kits, and help victims of crime. They include:

*Byrne Justice Assistance Grants (JAG).*—The Byrne Justice Assistance Grants program awards grants to state, local, and tribal governments to support a broad range of activities that prevent and control crime, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2020 Budget proposes \$405.2 million for this program. Included in this amount is \$5 million for Public Safety Partnerships, which provides intensive technical assistance to high-crime jurisdictions, and a new initiative to address Southwest Border violent crime (\$6 million). JAG will also fund other important officer safety programs serving state and local law enforcement, including the Bulletproof Vest Program

(\$22.5 million), the Body Worn Camera Partnership Program (\$22.5 million), and the VALOR Initiative (\$15 million).

**Comprehensive Addiction Recovery Act (CARA).**—The 2020 Budget includes \$330 million for programs authorized by the Comprehensive Addiction Recovery Act, including \$145 million for OJP's Comprehensive Opioid Abuse Program (COAP), which aims to reduce opioid abuse and the number of overdose fatalities. The request proposes to expand allowable uses of COAP funds to stimulant abuse. Another \$75 million is requested for the Drug Court Program, which addresses the needs of the drug-addicted, including those affected by the opioid crisis, by providing an alternative to incarceration to addicted offenders who enter the criminal justice system, addressing their addiction through treatment and recovery support services and subsequently reducing recidivism. The 2020 Budget also includes funding for the following CARA-authorized programs: Veterans Treatment Courts (\$20 million), Residential Substance Abuse Treatment (\$30 million), Justice and Mental Health Collaborations (\$30 million), and the Prescription Drug Monitoring Program (\$30 million).

**Second Chance Act Program.**—This program provides grants to establish and expand various adult and juvenile offender reentry programs and funds related research. Successful reintegration will reduce rates of criminal recidivism, thus increasing public safety. The 2020 Budget proposes \$85 million for this program. Of this total, \$6 million is to help states, localities, and tribes develop comprehensive, innovative probation and parole supervision programs and \$5 million is for the Children of Incarcerated Parents Demonstration Grant Program.

**STOP School Violence Act Program.**—This program aims to prevent or mitigate incidents of school violence. It supports training for teachers and education for students with the intent to prevent school violence, as well as specialized training for school officials in responding to related mental health crises that may precipitate violent attacks on schools. The program also promotes state, local, and tribal efforts to improve school security through evidence-based school safety programs making use of physical security measures, technology, and coordination with local law enforcement. The 2020 Budget proposes \$100 million for this program.

**Violent Gang and Gun Crime Reduction/Project Safe Neighborhoods (PSN).**—This program will create safer neighborhoods through sustained reductions in gang violence and gun crime. It is based on partnerships of federal, state, and local agencies led by the U.S. Attorney in each federal judicial district. This request will augment the work of DOJ's ongoing PSN initiative by increasing support for activities at the local level. Grants will support local law enforcement agencies, outreach- and prevention service providers, and researchers for activities implementing local PSN anti-violence strategies. The 2020 Budget proposes \$100 million for this program.

**Victims of Trafficking.**—This program supports comprehensive and specialized services for human trafficking victims, as well as multidisciplinary taskforces to identify, investigate, and prosecute these types of cases. The 2020 Budget proposes \$77 million for this program.

**Community Oriented Policing Services (COPS) Hiring Grants.**—The 2020 Budget merges the COPS Office into OJP. The COPS hiring program provides funding to state, local and tribal law enforcement agencies to hire additional sworn law enforcement officers to be deployed in community policing activities. The 2020 Budget proposes \$99 million for this program. Within this amount, \$8 million will be used to fund training and technical assistance that supports the integration of community policing strategies throughout the law enforcement community to effectively address emerging law enforcement and community issues; \$10 million will be used to support the Regional Information Sharing System; \$10 million is for the POLICE Act, and \$2 million is for Law Enforcement Mental Health and Wellness.

The Community Oriented Policing Services (COPS) Office administers grants and provides expertise and other assistance in advancing public safety through the implementation of community policing strategies in jurisdictions of all sizes across the country. Community policing is a philosophy that promotes organizational strategies that support the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues such as crime, social disorder, and fear of crime. In 2020, these community policing activities will be merged into the Office of Justice Programs (OJP), which provides leadership to federal, state, local and tribal systems, by disseminating state-of-the-art knowledge and practices across America by providing grants for the implementation of crime fighting strategies. Because most of the responsibility for crime control and prevention falls to law enforcement in states, cities, and neighborhoods, OJP has developed partnerships with state and local law enforcement. The transfer of community policing activities to OJP will allow the Department to centralize and strengthen the partnerships it has with its colleagues in State and Local law enforcement and to promote community policing not only through its hiring programs but also through the advancement of strategies for policing innovations and other innovative crime-fighting techniques.

The mission of the Office on Violence Against Women (OVW) is to provide Federal leadership in developing the nation's capacity to reduce domestic violence, dating violence, sexual assault, and stalking through the implementation of the Violence Against Women Act (VAWA).

Since its inception in 1995, OVW has awarded over \$8.1 billion in grants and cooperative agreements, and has launched a multifaceted approach to implementing VAWA. By forging state, local, and tribal partnerships among police, prosecutors, judges, victim advocates, health care providers, faith leaders, organizations that serve culturally specific and underserved communities and others, OVW grant programs help provide victims with the protection and services they need to pursue safe and healthy lives, while simultaneously enabling communities to hold offenders accountable for their violence.

The 2020 Budget proposes to transfer \$492.5 million from the Crime Victims Fund (CVF) to support OVW activities and programs.

The Budget requests \$492.5 million for programs administered by the Office on Violence Against Women (OVW) to prevent and respond to violence against women and related victims. OVW provides national leadership against domestic violence, dating violence, sexual assault, and stalking, and supports a multifaceted approach to responding to these crimes. To support this important work, the Budget proposes to transfer \$492.5 million from the Crime Victims Fund (CVF) to support OVW activities and programs. This transfer is part of a broader authorizing proposal that seeks to reform the CVF with the goal of better serving the victims of crime. In 2020, funding requested for this account will support the following initiatives:

**STOP Violence Against Women Formula Grant Program.**—The STOP Program is designed to encourage the development and strengthening of effective law enforcement and prosecution strategies to combat violent crimes against women and the development and strengthening of victim services in cases involving violent crimes against women. The 2020 Budget proposes \$215 million for this program.

**Transitional Housing Assistance Program.**—Transitional Housing grants provide assistance to victims of domestic violence, dating violence, sexual assault, and stalking who are in need of transitional housing, short-term housing assistance, and related support services. The 2020 Budget proposes \$35.5 million for this program.

**Research and Statistics on Violence Against Women (National Institute of Justice and the Bureau of Justice Statistics).**—This program supports research and statistics on violence against women. The 2020 Budget proposes to allow a transfer up to \$3.5 million for this program.

**Grants to Encourage Arrest Policies.**—This discretionary grant program is designed to encourage state, local, and tribal governments and state, local, and tribal courts to treat domestic violence, dating violence, sexual assault, and stalking as serious violations of criminal law requiring the coordinated involvement of the entire criminal justice system. The 2020 Budget proposes \$53 million for this program.

**Homicide Reduction Initiative.**—This initiative is designed to use promising and evidence-based practices to address the urgent problem of domestic violence related homicides by identifying high-risk offenders and providing an enhanced coordinated response to assist victims. For 2020, the Budget proposes a transfer of \$4 million to be made available from the Grants to Encourage Arrest Policies Program.

**Sexual Assault Services Program.**—This program provides funding for states and territories, tribes, state sexual assault coalitions, tribal coalitions, and culturally specific organizations. Overall, the purpose of this program is to provide intervention, advocacy, accompaniment, support services, and related assistance for adult, youth, and child victims of sexual assault, family and household members of victims, and those collaterally affected by sexual assault. The 2020 Budget proposes \$35 million for this program.

VIOLENCE AGAINST WOMEN PREVENTION AND PROSECUTION PROGRAMS—Continued

*Rural Domestic Violence Program.*—This program enhances the safety of child, youth and adult victims of domestic violence, dating violence, sexual assault, and stalking by supporting projects uniquely designed to address and prevent these crimes in rural jurisdictions. The 2020 Budget proposes \$40 million for this program.

*Grants to Reduce Violence Crimes Against Women on Campus.*—The Campus Program develops and strengthens victim services in cases involving violent crimes against women on campuses, and aims to strengthen security and investigative strategies to prevent and prosecute violent crimes against women on campuses. The 2020 Budget proposes \$20 million for this program, of which \$8 million is for a demonstration initiative to improve campus responses to sexual assault, dating violence, and stalking, which will not be subject to the restrictions of section 304(a)(2).

*Legal Assistance for Victims Grant Program.*—The Legal Assistance Program increases the availability of civil and criminal legal assistance in order to provide effective aid to victims who are seeking relief in legal matters arising as a consequence of abuse or violence. The 2020 Budget proposes \$45 million for this program.

*Enhanced Training and Services to End Violence Against and Abuse of Women Later in Life.*—This program provides or enhances training and services to address elder abuse, neglect, and exploitation, including domestic violence, dating violence, sexual assault, or stalking, involving victims who are 50 years of age or older. The 2020 Budget proposes \$5 million for this program.

*Education and Training to End Violence Against and Abuse of Women with Disabilities Grant Program.*—The Disabilities Grant Program builds the capacity of jurisdictions to address domestic violence, dating violence, stalking and sexual assault against individuals with disabilities through the creation of multi-disciplinary teams. The 2020 Budget proposes \$6 million for this program.

*Consolidation of Youth-Oriented Programming.*—This consolidated grant program consolidates the purpose areas of four programs under one competitive program. The four programs included in the consolidation include: Services to Advocate for and Respond to Youth, Grants to Assist Children and Youth Exposed to Violence, Engaging Men and Youth in Preventing Domestic Violence, and Supporting Teens through Education. This consolidation allows OVW to leverage resources for maximum impact in communities by funding comprehensive projects that include both youth service and prevention components. The 2020 Budget proposes \$11 million for this program.

*Indian Country-Sexual Assault Clearinghouse.*—This funding will support the establishment and maintenance of a national clearinghouse on the sexual assault of American Indian and Alaska Native women. This project will offer a one-stop shop for tribes to request free on-site training and technical assistance. The 2020 Budget proposes \$500,000 for this program.

*National Resource Center on Workplace Response.*—The Violence Against Women Act of 2005 provided for an award to establish and operate a national resource center on workplace responses to assist victims of domestic and sexual violence. The center will provide information and assistance to employers and labor organizations to better equip them to respond to victims. The 2020 Budget proposes \$500,000 for this program.

*Grants to Support Families in the Justice System.*—This funding will provide comprehensive support to victims of domestic violence and child sexual abuse and their families in family law matters in the civil justice system, including safe visitation and exchange services, improved court responses, and legal assistance to victims, protective parents, and their children. This program represents a consolidation of the Safe Havens and Court Training and Improvements program. The 2020 Budget proposes \$16 million for this program.

*Tribal Special Domestic Violence Criminal Jurisdiction.*—This grant program for tribal governments was first authorized in the Violence Against Women Reauthorization Act of 2013 (VAWA 2013). VAWA 2013 included an historic provision that recognizes the inherent power of "participating

tribes" to exercise "special domestic violence criminal jurisdiction" over both Indians and non-Indians who assault Indian spouses, intimate partners, or dating partners, or who violate protection orders, in Indian country. To support tribes that chose to participate, the Act authorizes funding to strengthen tribal criminal justice systems, provide indigent defense counsel, develop appropriate jury pools, and assist victims. The 2020 Budget proposes \$4 million for this program.

*Rape Survivor Child Custody Act Program.*—Directs the Attorney General to make grants to states that have in place a law that allows the mother of any child that was conceived through rape to seek court-ordered termination of the parental rights of her rapist with regard to that child, which the court shall grant upon clear and convincing evidence of rape. The 2020 Budget proposes \$1.5 million for this program. For 2020, funding requested for this account will also support Analysis and Research on Violence Against Indian Women, a program that is administered by the Office of Justice Programs and supports comprehensive research on violence against Native American women. The 2020 Budget proposes \$1 million for this program.

*Management and Administration.*—Within total grants funding, \$23.9 million will be provided for management and administration costs.

The 2020 Budget requests \$238.5 million for the Office of Justice Programs' (OJP) Juvenile Justice Programs. This appropriation account includes programs that support state, local, and tribal community efforts to prevent juvenile delinquency and crime and assist children who have been victimized by crime and child abuse. These programs also help states and communities improve their juvenile justice systems in ways that protect public safety, hold youth involved in the justice system accountable, and provide appropriate reentry services for youth returning to their communities after detention in secure correctional facilities.

The 2020 Budget requests \$58 million for the Part B: Formula Grants Program. Part B is the core program that supports state, local, and tribal efforts to improve the fairness and responsiveness of the juvenile justice system and to increase accountability of the juvenile offender. The Budget also requests \$2.5 million for the Prosecution and Defense Process Improvement Program (formerly Improving Juvenile Indigent Defense Program), which supports two areas of improvement for the juvenile justice system—juvenile prosecution and indigent defense. The juvenile prosecution component is a new addition to the program in 2020, and will support states in providing training and professional development and needed resources to ensure juvenile prosecutors have access to information that addresses the unique framework of the juvenile court system. Additionally, the Budget requests \$81 million for the Missing and Exploited Children Program (MECP), including Internet Crime Against Children (ICAC) task forces. Other major programs funded by this appropriation include Youth Mentoring (\$58 million), Delinquency Prevention (\$17 million), and Victims of Child Abuse Act (\$20 million).

The 2020 Budget requests \$139.8 million for the Office of Justice Programs' Public Safety Officers' Benefits (PSOB) Program, of which \$115 million is a mandatory appropriation for death benefits and \$24.8 million is a discretionary appropriation for disability and education benefits. This appropriation supports programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a partnership between the Department of Justice, national public safety organizations, and public safety agencies at the state, local, and tribal levels. The PSOB program oversees three types of benefits:

**Death Benefits.**—This program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

**Disability Benefits.**—This program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty.

**Education Benefits.**—This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty.

The 2020 Budget continues the Crime Victims Fund (CVF) reform effort included in the Budget. The CVF reform proposal would establish a \$2.3 billion mandatory annual appropriation for CVF. Included within this total are \$492.5 million for the Office on Violence Against Women; \$10 million to support oversight of OVC programs by DOJ's Office of the Inspector General; \$12 million for developing innovative crime victims services initiatives; and a set-aside of up to \$115.0 million to support tribal victims assistance grants. The Office for Victims of Crime (OVC) will provide formula and non-formula grants to the states to support crime victim compensation and victims services programs. The CVF proposal will

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act is intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and include substantial advance appropriation amounts. This account includes:

*Adult employment and training activities.*—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

*Youth activities.*—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer and year-round jobs. The program links academic and occupational learning with youth development activities.

*Dislocated worker employment and training activities.*—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment.

*Reintegration of Ex-Offenders.*—Supports activities authorized under section 169 of the WIOA to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. The Department also provides competitive grants for a range of young ex-offenders and school dropouts, particularly those in high-poverty, high-crime areas with similar services. The Administration intends to devote funds to test and replicate evidence-based strategies for young ex-offenders. The Department of Labor will continue to coordinate closely with the Department of Justice and other relevant Agencies in carrying out the Ex-Offender program.

*Apprenticeship.*—Activities that support and expand apprenticeship programs at the state and local levels through a range of activities, such as state-specific outreach strategies, partnerships, economic development strategies, and expanded access to apprenticeship opportunities for under-represented populations through pre-apprenticeships and career pathways.

*YouthBuild.*—Grants that impart education and occupational skills to program participants by providing them with academic training and occupational skills training, providing a clear path into a chosen career field.

The Budget proposes authorizing legislation to double the American Competitiveness and Workforce Improvement Act (ACWIA) fee for the H-1B visa program in order to help train American workers and close the skills gap. The proposal would increase the ACWIA fee to \$3,000 per worker for large employers and \$1,500 per worker for small employers. The increased revenue would provide additional funding for DOL job training grants to support apprenticeship. Under the proposal, the allocations for DOL job training grants (50 percent); DOL foreign labor certifications (5 percent); National Science Foundation (NSF) Innovative Technology Experiences for Students and Teachers program (10 percent); and DHS processing costs (5 percent) would remain the same. The NSF allocation for STEM scholarships would decrease from 30 percent to 15 percent, which would maintain absolute funding levels under current estimates. The proposal would initiate a new 15 percent allocation for the Department of Education's Career and Technical Education formula grant.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113-128, Title 1, Subtitle C, section 141), Job Corps is the nation's largest federally-funded, primarily residential, training program for at-risk youth. Job Corps provides economically disadvantaged youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military. Job Corps participants must be economically disadvantaged youth, between the ages of 16-24, and meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment.

Large and small businesses, nonprofit organizations, Native American organizations and Alaskan Native corporations manage and operate the majority of the Job Corps centers through contractual agreements with the Department of Labor, while the remaining centers are operated through an interagency agreement with the U.S. Department of Agriculture.

In accordance with the Administration's vision of a smaller, more effective Job Corps program, the FY 2020 Budget proposes to refocus the resources

JOB CORPS—Continued

of Job Corps on centers that have had more success in training and preparing youth for future careers. The FY 2020 Budget proposes to end USDA's involvement in the Job Corps program, given that workforce development is not a core part of the agency's mission. The Budget seeds new program models, including those that empower states to play a leading role in operating centers. The Budget also signals the Administration's intent to close chronically low performing contractor-operated centers and centers with severely dilapidated facilities. The Budget prioritizes enrollment for students age 20 and older, for whom the program has been proven to be more effective.

Community Service Employment for Older Americans (CSEOA), authorized by Title V of the Older Americans Act as amended in 2006 (P.L. 109-365), is a federally-sponsored community service employment and training program for unemployed low-income individuals, ages 55 and older. The program is proposed for elimination because it fails to meet its major statutory goals of fostering economic self-sufficiency and moving low-income seniors into unsubsidized employment.

The Budget includes a legislative proposal to refocus the TAA program on apprenticeship and on-the-job training strategies to ensure that participants are training for relevant occupations. States will also be encouraged to place a greater emphasis on intensive reemployment services for workers who are not participating in work-based training, getting those workers into the workforce more quickly.

*Unemployment compensation.*—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claim workloads increase above levels specified in the appropriations language.

*Employment service.*—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well as for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

Years are program years running from July 1 of the year indicated through June 30 of the following year.

*Foreign Labor Certification.*—This activity provides for the administration and operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural, CW-1 temporary, and H-1B temporary highly skilled worker visas. The account is divided into Federal and State activities.

*Federal Administration.*—Federal Administration provides leadership, policy, budget, program operations including staffing (Federal and contractors), information technology, three national processing center facilities, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

*State grants.*—State grants provides grants to State workforce agencies in 50 States and 5 U.S. territories funding employment-related activities

required for the administration of Federal foreign labor certification programs. Activities include State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

*American Job Centers.*—These funds are used to support the joint Federal-State efforts to improve the comprehensive American Job Center system authorized under the Workforce Innovation and Opportunity Act. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

*National Agricultural Workers Survey fee.*—The Department of Labor conducts the National Agricultural Workers Survey (NAWS), which collects information annually about the demographic, employment, and health characteristics of the U.S. crop labor force. The information is obtained directly from farm workers through face-to-face interviews.

The Budget proposes authorizing legislation to establish and retain fees to cover the costs of operating the foreign labor certification programs, which ensure that employers proposing to bring in immigrant workers have verified that American workers cannot meet their needs and that immigrant workers are being compensated appropriately and not disadvantaging American workers. The ability to charge fees for these programs would give the Department of Labor (DOL) a more reliable, workload-based source of funding for this function, similar to the Department of Homeland Security (DHS). The proposal would ultimately eliminate the need for discretionary appropriations. The proposal includes the following: 1) charge employer fees for its prevailing wage determinations; 2) charge employer fees for its permanent labor certification program; 3) charge employer fees for H-2B non-agricultural workers; 4) retain and adjust the H-2A agricultural worker application fees currently deposited into the General Fund; and 5) charge employer fees for CW-1 workers. The fee levels, including possible expedited processing fees, would be set via regulation to ensure that the amounts are subject to review. Given DOL OIG's important role in investigating fraud and abuse, the proposal also includes a mechanism to provide funding for OIG's work to oversee foreign labor certification programs.

In addition, the Budget proposes authorizing legislation to double the American Competitiveness and Workforce Improvement Act (ACWIA) fee for the H-1B visa program in order to help train American workers and close the skills gap. The proposal would increase the ACWIA fee to \$3,000 per worker for large employers and \$1,500 per worker for small employers. The increased revenue would provide additional funding for DOL job training grants to support apprenticeship. Under the proposal, the allocations for DOL job training grants (50 percent); DOL foreign labor certifications (5 percent); National Science Foundation (NSF) Innovative Technology Experiences for Students and Teachers program (10 percent); and DHS processing costs (5 percent) would remain the same. The NSF allocation for STEM scholarships would decrease from 30 percent to 15 percent, which would maintain absolute funding levels under current estimates. The proposal would initiate a new 15 percent allocation for the Department of Education's Career and Technical Education formula grant.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. It is also the mechanism used to make general fund reimbursements for some or all of the benefits and administrative costs incurred for temporary Federal programs. These funds are transferred from the Payments to the Unemployment Trust Fund account to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs or to the Extended Unemployment Compensation Account in the UTF for benefit costs.

The Middle Class Tax Relief and Job Creation Act of 2012 codified and expanded the definition of Short Time Compensation (STC), a layoff aversion strategy that enables workers to remain employed and employers to retain their trained staff during times of reduced business activity. Under the STC program, workers receive a percentage of unemployment benefits based upon the percentage of reduction in their hours of work. As an incentive for states to enact state STC programs and promote the use of STC, the Act provided for 100 percent reimbursement of STC benefit costs paid under state law for up to 156 weeks, or three years. Grant funding was also available to states whose permanent STC laws meet the new Federal definition.

This account provides mandatory general revenue funding for a temporary program established under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) and subsequently extended. This program paid a supplement of \$25 on every week of unemployment compensation. It was last extended in Public Law 111-157 and paid benefits through December 7, 2010, with a phaseout period. As a result of adjudications, benefits continue to be paid but are minimal.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1986; and for nonrepayable advances to the revolving fund established by section 901(e) of the Social Security Act, to the Unemployment Trust Fund as authorized by 5 U.S.C. 8509, and to the "Federal Unemployment Benefits and Allowances" account, such sums as may be necessary, which shall be available for obligation through September 30, [2020] 2021. (Department of Labor Appropriations Act, 2019.)

This appropriation makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110-343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This appropriation also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance (TAA) for Workers program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language included new authority for nonrepayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the UTF. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA if it runs

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS—Continued  
short of funds, and the borrowing authority will enable the ESAA to cover its obligations despite seasonal variations in the account's receipts.

The Department estimates that no advances will be necessary in 2019 and 2020. Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF or the BLDTF.

To address the potential need for significant and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The fiscal year 2020 request continues this authority.

ADVANCES TO THE EMPLOYMENT SECURITY ADMINISTRATION ACCOUNT OF THE UNEMPLOYMENT TRUST FUND

This account is a revolving fund that is available to make advances to the Employment Security Administration Account (ESAA) in the Unemployment Trust Fund under the provisions of section 901(e) of the Social Security Act. These repayable, interest-bearing advances permit financing of the Federal and State administrative costs of employment security programs when the balance in ESAA is insufficient. The borrowing authority

also enables ESAA to cover its obligations despite seasonal variations in the account's receipts.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). The UTF has two accounts for the railroad unemployment insurance system but for the Federal-State unemployment insurance system there are 57 separate accounts: one for each of the 50 states, three jurisdictions (District of Columbia, Puerto Rico, Virgin Islands) and four federal accounts. The state and jurisdiction accounts receive funds from a state unemployment insurance payroll tax which is used to pay benefits. The Federal Unemployment Tax Act (FUTA) payroll tax provides funds for two of the Federal accounts — the Employment Security Administration Account (ESAA) and the Extended Unemployment Compensation Account (EUCA) — while the remaining two, the Federal Unemployment Account (FUA) and the Federal Employee Compensation Account (FECA), are revolving accounts.

Except for FECA balances, funds on deposit in the UTF accounts are invested in Government securities until needed for payment of benefits or administrative expenses. The FUTA payroll tax is deposited in the ESAA which retains 80 percent of the deposit and pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, foreign labor certifications and about 97 percent of the costs of the Employment Service. The other 20 percent of FUTA is transferred to the EUCA which pays for

UNEMPLOYMENT TRUST FUND—Continued

certain extended benefit (EB) payments. During periods of high State unemployment, there is a stand-by program of EB, financed one-half by State unemployment taxes and one-half by the FUTA payroll tax.

The UTF also provides repayable advances (loans) from the FUA to States and jurisdictions when the balances in their individual accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

The Federal Employees Compensation Account (FECA) in the UTF provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA account can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the UTF, and receipts from a tax on railroad payrolls are deposited into the program's accounts in the UTF to meet expenses.

**Minimum Solvency Standard.**—Since the end of the most recent recession, many states continue to struggle to maintain adequate Unemployment Insurance (UI) Trust Fund balances. The Budget includes a proposal to add a minimum solvency standard in the UI program to help address the challenge states face in maintaining sufficient balances in their Unemployment Trust Fund accounts. This proposal would strengthen states' incentive to adequately fund their UI systems by making states that fail to maintain an Average High-Cost Multiple (AHCM) of 0.5 for two consecutive January firsts subject to the same FUTA tax credit reductions applied to states which go below a zero trust fund balance.

**UI Program Integrity Package.**—The Budget includes a package of program integrity proposals similar to those included in the proposed Unemployment Compensation Program Integrity Act, which the Department previously sent to Congress in response to the UI program's three consecutive years of high improper payment rates. Specifically, the package includes the following proposals:

**Require states to use SIDES.**—This proposal will require state UI agencies to use the State Information Data Exchange System (SIDES) to exchange information with employers concerning reasons for a claimant's separation from employment.

**Require states to cross-match against the NDNH.**—This proposal will require state UI agencies to use the National Directory for New Hires in their claims to better identify individuals continuing to claim unemployment compensation after returning to work, one of the leading root causes of UI improper payments.

**Allow the Secretary of Labor to establish UI corrective actions.**—This proposal will allow the Secretary of Labor to require states to implement corrective action measures for poor state performance in the UI program, helping to reduce improper payments in states with the highest improper payment rates. Currently, the Secretary has very limited options to require state UI agencies to take actions to respond to poor performance and high improper payment rates.

**Require states to cross-match with SSA's prisoner database.**—Under current law, state UI agencies' use of cross-matches is permissible and the Social Security Administration's (SSA) Prisoner Update Processing System (PUPS) is currently only used by some states for UI verification. Requiring states to cross-match claims against the PUPS or other repositories of prisoner information will help identify those individuals ineligible for benefits due to incarceration and reduce improper payments.

**Allow states to retain 5 percent of UI overpayments for program integrity use.**—This proposal will allow States to retain 5 percent of overpayment recoveries to fund program integrity activities in each state's UI program. This provides an incentive to states to increase detection and recovery of improper payments and provides necessary resources to carry out staff-intensive work to validate cross-match hits as required by law.

**Require states to use penalty and interest collections solely for UI administration.**—This proposal will require states to deposit all penalty and interest payments collected through the UI program into the state's Unemployment Trust Fund account and require the funds be used for improving state administration of the UI program and reemployment services for UI claimants. States with high improper payment rates would be required to use a portion of the funds for program integrity activities. Currently, states have discretion to use these funds for non-UI purposes.

**Require states to implement the Integrated Data Hub.**—This proposal would require the states to implement the Integrated Data Hub developed by the UI Integrity Center of Excellence to gain access to a fraud analytics database, sources of incarceration and mortality records, and a front-end identity verification tool.

**Offset Overlapping UI and Disability Insurance Benefits.**—The Budget includes a proposal to reduce an individual's entitlement to a Disability

Insurance benefit in any month in which the individual also receives an unemployment compensation benefit.

**Paid Parental Leave.**—The Budget includes a proposal to establish a Federal-state paid parental leave benefit program within the UI program that would begin in 2022. The program will provide six weeks of benefits for mothers, fathers, and adoptive parents. The benefit is provided to help families recover from childbirth and to bond with their new children.

The Pension Benefit Guaranty Corporation (PBGC) is a Federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned by 37,000,000 American workers in private defined benefit pension plans under two separate insurance programs. The Single-Employer Program protects about 26,200,000 workers and retirees in more than 23,400 pension plans. The Multiemployer Program protects more than 10,600,000 workers and retirees in about 1,400 pension plans. The Corporation receives no funds from general tax revenues. Operations are financed by insurance premiums paid by plans or the companies that sponsor them, investment income, and, in the Single-Employer Program, assets from terminated plans and recoveries of plan underfunding in sponsor bankruptcies. PBGC is requesting \$452,858,000 in spending authority for administrative purposes in 2020. The request includes \$7,380,000 for administering the termination of pensions from Sears Corporation, as well as an additional \$115,000 for the Office of Inspector General.

**Plan Preservation Efforts.**—PBGC works to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. Last year, PBGC worked with dozens of companies, both in bankruptcy and otherwise, to preserve their plans that were at risk. In 2018, PBGC:

—Paid \$153,000,000 in financial assistance to 81 multiemployer pension plans covering the benefits of over 62,300 existing retirees and 27,800 people entitled to benefits once they retire. Seven of the 81 plans, covering about 1,100 participants, became insolvent during FY 2018.

—Performed 13 multiemployer plan audits to protect the benefits of more than 14,000 people.

**Stepping in to Insure Pensions When Plans Fail.**—When plans do fail, PBGC steps in to ensure that basic benefits continue to be paid. Over the years, PBGC has become responsible for almost 1,500,000 people in over 5,000 failed plans. In 2018, PBGC:

—Paid \$5,800,000,000 in benefits to more than 861,000 retirees in single-employer plans.

—Monitored on average 1,500 companies for financial transactions that potentially pose risks to the financial viability of plans.

**Single-employer benefit payments.**—The Single-Employer Program protects about 26,200,000 workers and retirees in over 23,400 pension plans. Under this program, a company may voluntarily seek to terminate its plan, or PBGC may voluntarily seek to terminate its plan, or PBGC may seek termination. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, such as proving that continuing the plan would force the company to go out of business. If a terminated plan cannot pay at least the PBGC-guaranteed level of benefits, PBGC uses its funds to ensure that guaranteed benefits are paid. A sponsor may terminate a plan in a "standard" termination only if plan assets are sufficient to pay all benefits. In a standard termination, the sponsor closes out the plan by purchasing annuities from an insurance company or by paying benefits in a lump sum.

**Multiemployer financial assistance.**—The Multiemployer Insurance Program protects over 10,600,000 workers and retirees in about 1,400 pension plans. Multiemployer pension plans are maintained under collective bargaining agreements involving unrelated employers, generally in the same industry. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance (a loan to the plan) to continue paying guaranteed benefits.

**Investment management fees.**—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are driven by the amount of assets under management. They are a direct, programmatic expense required to maintain the Trust Fund which supports single-employer benefit payments.

**Consolidated Administrative Budget.**—PBGC's administrative budget comprises all expenditures and operations that support:

- Benefit payments to pension plan participants;
- Financial assistance to distressed multiemployer pension plans; and
- Stewardship and accountability.

These operations include premium collections, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Finally, this area includes the administrative functions covering procurement, financial management, human resources, facilities management, communications, legal support, and information technology infrastructure. These funds support the operations of the Participant and Plan Sponsor Advocate. They also support the required functions and efforts of the Office of the Inspector General, including training and participation in Council of the Inspector Generals on Integrity and Efficiency (CIGIE) activities.

The Budget proposes changes to PBGC's Multiemployer Program that would raise about \$18,000,000,000 in new premiums over the budget window, as well as new changes to the Single-Employer Program.

The Budget proposes to reform multiemployer premiums and improve the solvency of the program by creating a variable-rate premium (VRP) and an exit premium. A multiemployer VRP would require plans to pay additional premiums based on their level of underfunding, up to a cap, as is done in the Single-Employer Program. An exit premium, equal to ten times the variable-rate premium cap, would be assessed on employers that withdraw from a multiemployer plan to compensate the Multiemployer Program for the additional risk imposed on it when employers exit and cease making plan contributions. PBGC would have limited authority to design waivers for some or all of the VRP assessed to terminated plans or ongoing plans that are in critical status, if there is a substantial risk that the payment of premiums will accelerate plan insolvency resulting in earlier financial assistance to the plan. Aggregate waivers for a year would be

limited to 20 percent of anticipated total multiemployer VRP for all plans. The multiemployer premiums proposed in the Budget are expected to be sufficient to fund the Multiemployer Program for the next 20 years.

The Budget also calls for the repeal of provisions accelerating fiscal year 2026 premiums into fiscal year 2025 and repeals the requirement for certain multiemployer premium revenues to be held in non-interest bearing investments.

The Budget proposes to rebalance premiums in the Single-Employer program by pausing the indexation of single-employer premiums for one year and increasing the cap on the VRP, currently \$541 in 2019, to \$900 in 2020 and indexed thereafter. This targets higher premiums on plans with greater outstanding underfunding that pose a greater risk to PBGC. On net, these changes are expected to lower PBGC single-employer premium receipts by approximately \$30 million over the coming decade, granting employers relief and better aligning premium burden on higher risk plans.

*Federal Employees' Compensation Act benefits.*—The Federal Employees' Compensation Act (FECA) program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). A workers' compensation case is created following the receipt of an injury report or claim for occupational disease. In 2020 the FECA program projects to create 107,900 cases for Federal workers or their survivors; 16,800 Federal employees are projected to submit initial wage-loss claims; and 39,400 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

The remainder is provided from the Special Workers' Compensation Fund, which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

The 2020 Budget incorporates longstanding Government Accountability Office, Congressional Budget Office, and Labor Inspector General recommendations to improve and update the Federal Employees' Compensation Act (FECA). The last major amendments to FECA were made in 1974. The Administration proposes changes that generate cost savings by simplifying FECA benefit rates, introducing controls to prevent fraud and limit improper payments, and modernizing benefit administration. The proposal would reform the FECA program prospectively to simplify benefits to provide a single compensation rate at 66 2/3 percent of the injured workers' pay; reduce benefit levels at full Social Security Administration retirement age; prevent retroactive election of FECA benefits after claimants have declined them in favor of federal retirement; apply a consistent waiting period for compensation for all covered employees; increase benefits for funeral expenses and severe disfigurement; suspend payments to indicted medical providers; and make other changes to improve program integrity and reduce improper payments. These reforms would produce 10-year government-wide savings of more than \$730 million, and approximately \$220 million in net savings.

**Energy Employees Occupational Illness Compensation Act of 2000 (EEOICPA) benefits.**—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses. This program is EEOICPA Part B.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

**Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.**—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E; the program described above is Part B) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act.

The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act of 2015 (P.L. 113–291) amended EEOICPA to include Section 3687, creating the Advisory Board on Toxic Substances and Worker Health to advise the Secretary of Labor (as delegated by Executive Order 13699) with respect to technical aspects of the EEOICPA program. The Advisory Board is charged with advising the Secretary on four statutorily-specific technical issues related to EEOICPA: DOL's site exposure matrices; medical guidance for claims examiners; evidentiary requirements for claims under subtitle B related to lung disease; and the work of industrial hygienists and staff physicians and consulting physicians to ensure quality, objectivity, and consistency.

For 2020, there are two changes in the Energy Employees Occupational Illness Compensation Program Act Appropriations language which repeal Part E authorizing language to make the Part E administrative expenses amount a definite appropriated mandatory with directed scoring language (as Part B currently is), and make administrative expenses for Part B and Part E into two activities in one appropriation, allowing shifting of funds between the two activities.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107-275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These monies are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

*Note.—As of January 1, 2019, the coal excise tax rates on underground-mined coal are \$.50 per ton or 2% of the sales price (whichever is lower) and \$.25 per ton or 2% of the sales price (whichever is lower) on surface-mined coal.*

The trust fund consists of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

The trust fund is available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The mission of the Office of Labor-Management Standards (OLMS) is to ensure that the nation's labor union members are protected by ensuring that unions are operated with transparency, integrity and democracy. It is OLMS' goal to facilitate oversight and offer transparency to the union members. It does so by receiving and disclosing reports filed by unions, union officers and employees, employers, labor consultants, and others in accordance with the Labor Management Reporting and Disclosure Act (LMRDA), including union financial reports and employer and consultant activity reports. To ensure financial integrity, OLMS audits union financial records and investigates possible embezzlements of union funds. To ensure democracy, OLMS conducts union officer election investigations and supervises reruns of union officer elections pursuant to voluntary settlements or after court determinations that elections were not conducted in accordance with the LMRDA. In addition, OLMS administers a statutory program to certify employee protection provisions are included in grants and contracts under various Federally-sponsored transportation programs.

With the restoration of the OLMS core enforcement program in FY 2020, OLMS will advance union democracy, transparency, and financial integrity protections by increasing the number of compliance audits to 400 and criminal investigations to 315 annually. OLMS will fully operate the International Union Compliance Audit Program (I-CAP) to safeguard union members' assets held at the international and national levels of union governance. OLMS will also ensure that federally sponsored transportation grants are processed in a timely manner and that they provide requisite protection to employees against adverse impacts that could result from projects funded with federal assistance.

**Safety and Health Standards.**—This activity provides for the protection of workers' safety and health through development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is cost effective when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) process, that small business concerns are taken into account in the process of developing standards.

**Federal Enforcement.**—This activity provides for the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to a focus on specific high-hazard industries and worksites. Enforcement is prioritized by the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards.

**Whistleblower Programs.**—This activity provides for the enforcement of twenty-two whistleblower protection statutes, including Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. In addition to the OSH Act, this activity includes administration of twenty-one other whistleblower protection statutes that protect employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, food safety, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, automotive manufacturing, and securities laws.

**State Programs.**—This activity supports states that assume responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities.

**Technical Support.**—This activity provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or man-made disasters. This activity also provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

**Federal Compliance Assistance.**—This activity supports a broad range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on high-hazard industries, small business, and other hard-to-reach workers. OSHA works with employers and employees through cooperative programs, such as the Voluntary Protection Programs to recognize employers with exemplary safety and health programs, and Alliances and Strategic Partnerships that commit organizations to proactively collaborate with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including online.

**State Compliance Assistance: Consultation Grants.**—This activity supports 90 percent federally funded cooperative agreements with designated State agencies to provide free on-site safety and health consultation to small and medium-sized employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments in high-hazard industries. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

**Safety and Health Statistics.**—This activity supports the agency's information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These services are provided through an integrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

**Executive Direction and Administration.**—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

**Enforcement.**—The enforcement strategy in 2020 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses, combining the Coal and Metal/non-metal activities. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to prevent death, disease, and injury from mining and promote safe and healthful workplaces for the Nation's miners.

**Standards.**—This activity develops standards and regulations for the mining industry that protect the safety and health of miners.

*Jobs for Veterans State grants.*—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans' Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans (38 U.S.C. 4215) within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, grants are allocated to States according to the statutory formula to support Disabled Veterans' Outreach Program (DVOP) specialists and Local Veterans' Employment Representative (LVERs) staff.

Disabled Veterans' Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on assisting veterans with significant barriers to employment.

LVER staff (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement ser-

vices provided to veterans under the applicable State employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

**Transition Assistance Program (TAP).**—This program provides employment workshops for separating service members and their spouses to prepare these individuals for entry into the civilian workforce and job market. Its primary goal is to expedite and facilitate the transition from military to civilian employment. VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. TAP is being updated based on changes in the 2019 National Defense Authorization Act to provide service members with earlier access to tailored services. DOL responsibilities will include an initial employment planning workshop for all transitioning service members, a two day general employment workshop and a two-day Career Exploration and Planning Track (CEPT) workshop for transitioning service members interested in apprenticeship opportunities and technical careers. This program is conducted consistent with the TAP Interagency Memorandum of Understanding and associated Interagency governance.

**National Veterans' Training Institute (NVTI).**— NVTI develops and supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

**Homeless Veterans' Reintegration Program (HVRP).**—HVRP (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to assist homeless veterans reintegrate into meaningful employment and stimulate the development of effective service delivery systems that will address the complex problems facing homeless veterans. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

**Federal management.**—VETS' Federal management budget activity supports the Federal administration of 38 U.S.C. §§ 41, 42, and 43. This allows VETS to carry out programs and develop policies to provide employment and training opportunities designed to meet the needs of veterans (38 U.S.C. 4102–4115). It also enables VETS to discharge its responsibilities to administer, interpret, and help enforce the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), 38 U.S.C. §§ 4301–4335, by providing technical assistance and investigating complaints received from veterans and service members who believe their employment and reemployment rights were violated. This budget activity enables VETS to investigate complaints received from veterans who claim a violation of their veterans' preference rights in Federal hiring pursuant to the Veterans' Employment Opportunities Act of 1998 (VEOA), 5 U.S.C. § 3330a. VETS' Federal Contractor Program (VETS-4212) is also supported under this activity, pursuant to 38 U.S.C. § 4212. These responsibilities involve the administration of a system whereby Federal contractors submit reports setting forth their affirmative action efforts to hire and retain eligible veterans.

Resources under the Federal management activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A(b)(5)), and the Homeless Veterans Reintegration (38 U.S.C. 2021). VETS personnel provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

Federal management supports the oversight and development of policies for TAP (10 U.S.C. 1144 and 38 U.S.C. 4113). Through outreach and education efforts, such as job fairs, VETS staff raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported through this budget activity. In addition, through fee collection, the federal management activity fund administrative processes associated with the HIRE VETS Medallion program.

*Departmental Support Systems.*—This activity represents a permanent, centralized IT investment fund for the Department of Labor managed by the Chief Information Officer. The fund supports enterprise-wide IT security enhancements that facilitate a centrally managed IT environment with increased risk mitigation parameters to protect the integrity of DOL data and network availability. These efforts are achieved through several new and ongoing projects mandated by executive and congressional directives.

*IT Infrastructure Modernization.*—This Chief Information Officer-managed activity funds the effort to transform nine major independently funded and managed IT infrastructure silos at the sub-agency level into a unified IT infrastructure. The unified infrastructure will be centrally managed and provide all agencies with general purpose business productivity tools, a shared environment for common data sources, and the underlying IT services to support it.

Diplomatic Programs (DP), previously called Diplomatic and Consular Programs (D&CP), is financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP), which are to remain available until expended. DP is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2020 request includes base funding for the State Department operations in Iraq, Afghanistan, Pakistan, and other High Threat Posts (HTP).

Funds are requested in the following categories:

*Human Resources.*—This category supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. Professional development and training is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

*Overseas Programs.*—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2020 will support 275 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

*Diplomatic Policy and Support.*—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in DP includes resources that are used for the creation, collection, processing, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Components of the information management activity include: telecommunications, information security, information system services, pouch, mail and publishing services for both unclassified and classified information. These activities include domestic and overseas execution of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA.

*Security Programs.*—This category provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the

Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Programs covered in this activity include but are not limited to: security operations; engineering services, which are related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations.

**WORLDWIDE SECURITY PROTECTION**

Section 7070 establishes a new Worldwide Security Protection (WSP) account in the Treasury, separate from the Diplomatic Programs (DP) account, and authorizes the transfer of unobligated WSP balances into the new account no later than October 1, 2020. Establishing a separate account would facilitate administration of WSP funds and increase the transparency of WSP expenditures. Requesting the creation of the new account in FY 2020 will provide the Department with adequate time to prepare for implementation of the account split at the beginning of the following fiscal year. The intention is to request WSP funding in the separate account as part of the FY 2021 President's Budget.

The Consular and Border Security Programs account (CBSP) uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharges, Immigrant Visa Security surcharges, Diversity Visa Lottery fees, and Affidavit of Support fees. In FY 2017 and prior years, these fees were credited in the Diplomatic and Consular Programs account as spending authority from offsetting collections. The Consolidated Appropriations Act of FY 2017 enacted a new standalone account to display fee-funded consular programs independent of the larger Diplomatic Programs (formerly Diplomatic and Consular

CONSULAR AND BORDER SECURITY PROGRAMS—Continued

Programs) account that began in FY 2019. This change enables the Department to provide greater transparency and accountability in financial reporting on these fees and surcharges, facilitate budget estimates for these fees and surcharges, and more easily make the information available to users of budget information and other stakeholders.

Section 7024(i) of the general provisions provides a new permanent extension of the Western Hemisphere Travel Initiative Surcharge. Section 7049 provides legislative language expanding the authorities of the Border Crossing Card and Passport Security Surcharge. It also includes a transfer authority between the CBSP account and accounts under the heading Administration of Foreign Affairs. Finally, Section 7050 provides the ability to use the Fraud Prevention and Detection fees for the prevention and detection of all visa fraud.

These consular fees and surcharges support an array of activities that are vital to ensuring strong U.S. border security, including routine and emergency services for U.S. citizens overseas; the issuance of secure passports to U.S. citizens at 29 passport facilities and a partner network of more than 8,000 passport acceptance facilities domestically; the adjudication of visa applications; the prevention and detection of fraud involving visas and passports; and the Department's information technology programs. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department has built a layered visa and border security screening system that rests on training, technological advances, biometric innovations and expanded data sharing.

This appropriation provides funding to the Bureau of Educational and Cultural Affairs (ECA) for international exchange programs authorized by the Mutual Educational and Cultural Exchange Act of 1961, as amended, to support U.S. foreign, economic, security policy objectives and to advance U.S. influence overseas. These goals are addressed by building increased mutual understanding through international exchange and professional development activities. Beginning in FY 2020, resources in this appropriation also support the conduct of a select group of international information programs of the United States previously reflected in the Diplomatic Programs appropriation (American Spaces, U.S. Speakers and TechCamp programs). Additional programs under this appropriation include:

**Academic Programs.**—Includes the J. William Fulbright Educational Exchange Program, which provides U.S. and foreign students, teachers, scholars, and administrators the opportunity to pursue degrees, teach, and conduct research in foreign and U.S. universities. Academic Programs also include English language programming and educational advising services. English language programs help train and develop foreign teachers of English, send Americans overseas to teach English and train instructors, teach English to disadvantaged students, and provide language learning materials and resources. Educational advising programming supports outreach to foreign students across the world to assist in the process of applying to U.S. universities. Additional academic programs such as the Benjamin A. Gilman International Scholarship Program provide opportunities for American participants with financial needs to study abroad.

**Professional/Cultural Exchanges.**—Includes exchanges linking U.S. and foreign participants in multiple fields directly tied to U.S. foreign policy goals. The International Visitor Leadership Program brings thousands of foreign leaders to the United States for intensive short-term professional exchanges to meet and confer with their American counterparts, gaining first-hand knowledge about U.S. society, culture and democratic values. Citizen Exchanges Program participants partner with an extensive network of organizations and experts from across the United States to conduct professional fellowships as well as arts, sports, and high school exchange programs focused on current and future leaders.

**Youth Leadership Initiatives.**—Includes programs targeting young private, public, and civil sector leaders in Africa, Southeast Asia and the Americas.

**Program and Performance.**—Provides resources and opportunities to ECA exchange program alumni to build on participant exchange experience, developing growing and active alumni association networks. Funds also support on-going program performance measurement and independent evaluations.

**Exchanges Support.**—Includes all domestic staff, overseas Regional Language Officers and support costs managed by ECA; as well as government-wide exchanges coordination.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2020, the Department will manage the sixteenth year of the Capital Security Cost Sharing (CSCS) Program. This program has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use of cost-sharing. The \$2.2 billion program is consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. Funding sources include ESCM regular base, interagency contributions, and consular fee revenues.

The 2020 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and protect the U.S. taxpayer investment. MCS and CSCS are funded within a combined \$2.2 billion program in FY 2020.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

## EMBASSY SECURITY, CONSTRUCTION, AND MAINTENANCE—Continued

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2020 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System; and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance

derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSNDCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the USG. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consist-

ent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, which is available without fiscal year limitations, is authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor

pool, operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology support, medical services, aviation services, special issuance passport services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under the authority of the Foreign Missions Act.

The International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998 using the Working Capital Fund. ICASS allows more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

The Foreign Service Retirement and Disability Fund (FSRDF) was established in 1924 to provide pensions to retired and disabled members of the Foreign Service. The FSRDF's revenues consist of contributions from active participants and their U.S. Government agency employers; appropriations; and interest on investments. Monthly annuity payments are made to eligible retired employees or their survivors. The FSRDF includes the operations of two separate retirement systems—the Foreign Service Retirement and Disability System (FSRDS) and the Foreign Service Pension System (FSPS). This appropriation provides mandatory funding for the Foreign Service Retirement and Disability Fund (FSRDF) as prescribed in the Foreign Service Act of 1980 as authorized in Section(s) 821 and 822.

This appropriation provides the United States' treaty mandated assessments and expenses to 19 international commissions and organizations including three bilateral commissions, the Great Lakes Fisheries Commission, the International Pacific Halibut Commission, the Pacific Salmon Commission, nine multilateral bodies, two marine science organizations, one whaling commission, the Arctic Council and the Antarctic Treaty Secretariat, as well as funding regional sea turtle and shark conservation, and travel expenses of non-government U.S. commissioners and their advisors. These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

in the context of a scientific study in which participants are advised of potential risks and benefits; and, not less than 60 days after the date on which the USAID Administrator determines that there has been a violation of the requirements contained in paragraph (1), (2), (3), or (5) of this proviso, or a pattern or practice of violations of the requirements contained in paragraph (4) of this proviso, the Administrator shall submit to the Committees on Appropriations a report containing a description of such violation and the corrective action taken by the Agency: Provided further, That in awarding grants for natural family planning under section 104 of the Foreign Assistance Act of 1961 no applicant shall be discriminated against because of such applicant's religious or conscientious commitment to offer only natural family planning; and, additionally, all such applicants shall comply with the requirements of the previous proviso: Provided further, That for purposes of this or any other Act authorizing or appropriating funds for the Department of State, foreign operations, and related programs, the term "motivate", as it relates to family planning assistance, shall not be construed to prohibit the provision, consistent with local law, of information or counseling about all pregnancy options: Provided further, That information provided about the use of condoms as part of projects or activities that are funded from amounts appropriated by this Act shall be medically accurate and shall include the public health benefits and failure rates of such use: Provided further, That funds made available under this heading may be made available for contributions to international organizations, programs administered by such organizations, and multilateral trust funds.

In addition, for necessary expenses to carry out the provisions of the Foreign Assistance Act of 1961 for the prevention, treatment, and control of, and research on, HIV/AIDS, \$4,308,367,000, to remain available until September 30, 2024, which shall be apportioned directly to the Department of State: Provided, That funds appropriated under this paragraph may be made available, notwithstanding any other provision of law, except for the United States Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003 (Public Law 108–25), as amended, for a United States contribution to the Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund), and shall be expended at the minimum rate necessary to make timely payment for projects and activities: Provided further, That the amount of such contribution should be \$958,367,000: Provided further, That up to 5 percent of the aggregate amount of funds made available to the Global Fund in fiscal year 2020 may be made available to USAID for technical assistance related to the activities of the Global Fund: Provided further, That funds appropriated under this paragraph may be made available, in addition to amounts otherwise available for such purposes, for administrative expenses of the Office of the United States Global AIDS Coordinator.

Note.—A full-year 2019 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2019 (Division C of P.L. 115–245, as amended). The Global Health Programs account funds health-related foreign assistance for the Department of State (DOS) and the U.S. Agency for International Development (USAID). Global health programs seek to improve health outcomes by increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing in country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

*Global Health Programs-State.*—The Global Health Programs (GHP-State) account supports the goal of controlling the HIV/AIDS epidemic through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2020 Budget requests \$4.308 billion in the GHP-State account. PEPFAR is led by the Office of the Global AIDS Coordinator in DOS, which draws upon the expertise and experience of other USG partners such as USAID, the Department of Health and Human Services, the Department of Defense, and the Peace Corps to align resources and expertise in the fight against global AIDS. Programs work through expanded partnerships to build capacity for effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and country-level health and development approach. In addition, PEPFAR supports implementation of strong monitoring and evaluation systems to set benchmarks for outcomes and programmatic efficiencies through regularly assessed planning and reporting processes to ensure goals are being met. PEPFAR programs support strategic, scientifically sound investments to rapidly scale up core HIV/AIDS prevention, care, and treatment interventions within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. PEPFAR integrates its efforts with important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution of \$958 million to the Global Fund to Fight AIDS, Tuberculosis and Malaria is included in the GHP-State request. This amount will support a \$1.1 billion contribution in 2020 and up to \$3.3 billion over the three-year

GLOBAL HEALTH PROGRAMS—Continued

replenishment period, when combined with unmatched funds from the last replenishment appropriated by Congress for 2019. The Budget offers to match \$1 for every \$3 contributed by other donors.

**Global Health Programs-USAID.**—The 2020 Budget requests \$2.035 billion in the GHP-USAID account for a comprehensive and integrated approach to improve global health outcomes. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and other public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for vulnerable populations. Funding includes activities that support the goal of ending preventable child deaths in synergy with malaria, family planning and reproductive health, and nutrition activities, addressing such issues as micronutrient deficiencies and community management of acute malnutrition. Activities will also address the threat of other infectious diseases such as tuberculosis and multi-drug resistant tuberculosis, and neglected tropical diseases in developing countries.

Funds requested in the Migration and Refugee Assistance (MRA) account will be used to support:

**Humanitarian Migrants to Israel.**—These funds assist humanitarian migrants resettling in Israel.

**U.S. Refugee Admissions.**—MRA funds overseas processing, transportation, and initial placement for refugees and certain other categories of special immigrants resettling in the United States. These activities are carried out primarily by NGO partners and the International Organization for Migration (IOM).

**Administrative Expenses.**—These funds finance the salaries and operating expenses in Washington, D.C. and overseas for the Bureau of Population, Refugees, and Migration. (Note: Funds for the salaries and support costs of the positions dedicated to international population policy and coordination are requested under the Department of State's Diplomatic Programs appropriation.)

In past years, the majority of the MRA account addressed the protection and assistance needs of refugees, conflict victims, stateless persons, and vulnerable migrants worldwide. Funds primarily supported the programs of international organizations, including the United Nations High Commis-

sioner for Refugees (UNHCR), the International Committee of the Red Cross (ICRC), and IOM, as well as non-governmental organizations (NGOs).

As part of an Administration effort to optimize humanitarian assistance, prioritize funding, and use funding as effectively and efficiently as possible, there is no request in MRA for overseas humanitarian assistance needs. Instead, these funds along with funds previously requested in International Disaster Assistance (IDA) account are consolidated in the new International Humanitarian Assistance (IHA) account.

Funds in IHA will support all aspects of overseas humanitarian assistance, including shelter, protection, emergency health and nutrition, the provision of safe drinking water, livelihoods supports, emergency food interventions, rehabilitation, disaster risk reduction, and transition to development assistance programs and will support the programs of international organizations, including UNHCR, ICRC, and IOM, the World Food Program (WFP), the UN Office for the Coordination of Humanitarian Affairs (OCHA), as well as non-governmental organizations (NGOs).

In addition, appropriations language under the MRA account gives the Secretary of State authority to transfer funding from IHA to MRA should projected funding for refugee resettlement not be sufficient.

International Narcotics Control and Law Enforcement (INCLE) advances U.S. national security interests by supporting bilateral, regional, and global programs that enable partners and allies to manage and address transnational threats at their source. INCLE programs mitigate security threats posed by all forms of transnational crime, including production and trafficking of narcotics, and strengthen partner countries' criminal justice systems. These programs improve the ability of partner countries to cooperate effectively with U.S. law enforcement, and address the underlying conditions, such as corruption and weak rule of law, that foster state fragility and spur irregular migration to the United States. The 2020 INCLE budget supports Presidential policy priorities, including efforts to protect the safety of the United States and its citizens by combating transnational crime and illicit trafficking, in alignment with Executive Order 13773, Enforcing Federal Law with Respect to Transnational Criminal Organizations and Preventing International Trafficking, and the President's Initiative to Stop Opioid Abuse and Reduce Drug Supply and Demand.

Established by the Millennium Challenge Act of 2003, the Millennium Challenge Corporation (MCC) has the statutory goal of providing assistance to the poorest countries in the world to promote economic growth, eliminate extreme poverty, and strengthen good governance, economic freedom, and investments in people. Since its inception, MCC has signed 37 compacts and 28 threshold program agreements, totaling \$12 billion. These investments help foster stability through economic growth and poverty reduction in partner countries. MCC encourages policy reforms by working with only those countries that have created the conditions for growth by ruling justly, investing in their people, and committing to economic freedom,

with a particular emphasis on fighting corruption and maintaining democratic rights. Countries develop their poverty reduction proposals in broad consultation with their own civil society and MCC. MCC's evidence-based approach leads to compacts that specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively.

Programs funded through the Economic Support Fund (ESF) account help foster stable, resilient, prosperous, inclusive, and self-reliant countries of strategic importance to meet their near and long-term political, economic, development, and security needs. The 2020 Budget consolidates the ESF; Development Assistance (DA); Assistance for Europe, Eurasia and Central Asia (AEECA); and Democracy Fund (DF) accounts into the Economic Support and Development Fund (ESDF) account. This integration will streamline accounts and ensure the most effective use of foreign assistance funding. The 2020 Budget prioritizes and focuses foreign assistance in regions and on programs that advance our national security and protect the American people, promote U.S. prosperity and economic opportunities, and advance American interests and values around the world, while also continuing to ensure efficiency, effectiveness, and accountability to the U.S. taxpayer.

The Global Security Contingency Fund (GSCF) permits the Department of State and the Department of Defense to combine resources and expertise to address emergent challenges and opportunities. The GSCF can be used to provide military and other security sector assistance to enhance a country's national-level military or other security forces' capabilities to conduct border and maritime security, internal defense, and counterterrorism operations, or to participate in or support military, stability, or peace support operations, consistent with U.S. foreign policy and national security interests. The GSCF can also be used to provide assistance to the justice sector (including law enforcement and prisons), rule of law programs, and stabilization efforts in cases where civilian providers are challenged in their ability to operate. Assistance programs under this account are collaboratively developed by the Department of State and the Department of Defense. The fund allows direct contributions from each Department to be transferred into the fund for implementation by the most appropriate agency in a given situation, be it State, Defense, the U.S. Agency for International Development, or others. No direct funding is requested in 2020.

The Foreign Military Loan Liquidating Account records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the Foreign Military Loan Liquidating Account, thus transferring the loans from the Liquidating Account to the MDRF Account.

Treasury requests \$206.5 million towards the first of up to six installments under the current International Bank for Reconstruction and Development's (IBRD) capital increase.

IBRD is the arm of the World Bank that provides financing to credit-worthy middle-income countries to promote inclusive economic growth and reduce poverty. Middle-income countries—home to over 70 percent of the world's poor—rely on the IBRD for financial resources and strategic advice to meet their development needs. Working across a range of sectors, including good governance, agriculture, sustainable infrastructure, health and nutrition, and education, the IBRD supports long-term human and social development needs that private creditors do not finance. During its 2018 fiscal year, the IBRD approved \$23 billion in loans and technical assistance. The Middle East and North Africa (25.8 percent) received the largest portion of the IBRD's new lending, followed by South Asia (19.5 percent), East Asia and the Pacific (17.3 percent), Latin America and the Caribbean (16.9 percent), Eastern Europe and Central Asia (15.4 percent), and Sub-Saharan Africa (4.8 percent). The United States is the largest shareholder in the IBRD, with a 15.98 percent share of total voting power, followed by Japan and China. The United States is the only country with veto power over amendments to the Articles of Agreement.

### Global Environment Facility

The Global Environment Facility (GEF) is one of the largest dedicated funders of projects to improve the global environment, providing grants to address issues related to conservation, including wildlife trafficking, overfishing, land degradation, chemical pollution and other environmental concerns. The GEF benefits the U.S. economy and environment by addressing many external environmental problems that affect our domestic health, safety, and prosperity; in addition, since the GEF was established, 127 U.S. companies and consultants from 29 states have received contracts to participate in 119 GEF-backed projects. GEF-7 began on July 1, 2018 and will conclude on June 30, 2022. No funding is requested for the GEF in 2020 since FY 2019 anticipated appropriations are sufficient to cover the first two payments to GEF-7.

### International Finance Corporation

The International Finance Corporation (IFC) is the private sector focused part of the World Bank Group. Established in 1956, it promotes private sector development in developing countries by making loans and equity investments in private sector projects, mobilizing private capital alongside its own resources, and providing advisory and technical assistance services. In its 2018 fiscal year, the IFC approved \$11.6 billion from its own resources, and mobilized an additional \$11.6 billion from other sources, for 366 projects in 74 countries. Of the IFC's own resources and mobilized private finance, more than \$6.8 billion was for the poorest countries (those

eligible for funding from the World Bank's IDA). IFC investments in 2018 were spread across the globe, with the largest recipient regions being Latin America and the Caribbean (21.5 percent), Europe and Central Asia (19.4 percent), and South Asia (17.8 percent). The top sectors for IFC investment in 2018 were financial markets (47.3 percent), infrastructure (17.8 percent), and agribusiness and forestry (8.2 percent). The IFC also spent \$273 million for advisory services in 2018, with sub-Saharan Africa receiving \$86 million (32 percent). No funding is requested for the IFC in 2020.

Treasury requests \$1,097 million for the International Development Association (IDA) in support of IDA programs over the eighteenth replenishment (IDA-18; FY 2018-FY 2020), including towards the third of three installments to IDA-18.

IDA is the part of the World Bank that supports the growth and development of the world's 75 poorest countries. IDA works across a wide range of sectors including education, basic health, clean water and sanitation, the environment, infrastructure, and agriculture. Because countries receiving IDA financing are too poor to attract sufficient capital to support their significant development needs, they depend on concessional finance—low-cost loans and grants—to create jobs, build critical infrastructure, improve governance and public service delivery, increase agricultural productivity, increase access to energy, and invest in the health and education of future generations. IDA's goal is to help countries reduce poverty and achieve higher levels of growth and institutional capacity. Over time, IDA's support helps countries finance their development needs through domestic revenues and borrowing at non-concessional rates, including through international markets. Since its inception, IDA has provided 370 billion dollars for investments in over 113 countries. As of the beginning of IDA-18, 35 countries once eligible for IDA assistance have graduated and no longer receive concessional support from IDA. Of the \$24 billion approved in IDA's 2018 fiscal year, more than half—\$15.4 billion—went to countries in Africa, while countries in the South Asia region received the second largest amount, \$6.1 billion. Twenty percent of IDA's resources supported fragile states in IDA's 2018 fiscal year.

## CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION—Continued

**Multilateral Debt Relief Initiative**

Launched in 2006 at the urging of the United States, the Multilateral Debt Relief Initiative (MDRI) provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the African Development Bank. Countries receive MDRI benefits after completing the reforms under the Heavily Indebted Poor Countries (HIPC) Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development. In accordance with the MDRI, donors compensate IDA for the cancelled debt on a dollar-for-dollar basis according to the payment schedules of the original loans. IDA calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Each donor's commitments to MDRI at IDA must be met within the three-year replenishment period to avoid a negative impact on IDA's financial capacity. With a 20.1 percent burden share, the U.S. share of the cost of MDRI under IDA-18 (FY 2018-FY 2020) is \$592.5 million. No funding is requested for IDA MDRI in 2020.

The Inter-American Development Bank (IDB) is the largest source of development financing for 26 countries in Latin America and the Caribbean, a strategically significant and economically important region for the United States where 73 million people live in poverty. The IDB works in a range of sectors and commits roughly half of its funding to support infrastructure through projects in water and sanitation, transportation and energy. The other half is split between capacity building, including reform of govern-

ment operations and financial markets, and social sectors, including social investment, health, and education. The United States is the largest shareholder in the IDB, with 30 percent of total shareholding, enabling the United States to wield significant influence over major decisions about the direction of the IDB. No new funding is requested for IDB in 2020.

**Inter-American Investment Corporation**

The Inter-American Investment Corporation (IIC), a member of the Inter-American Development Bank Group established in 1984, promotes development of the private sector in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the IDB itself. In 2017, the IIC implemented organizational and operational reforms stemming from the 2016 consolidation of the IDB's private sector financing activities into the IIC. As a result of this consolidation, the IIC's mandate has expanded from a focus on small- and medium-sized enterprises to include financing for private infrastructure and corporate entities. No funding is requested for the IIC in 2020.

The Asian Development Bank (AsDB) promotes broad-based sustainable economic growth and development, poverty alleviation, and regional cooperation and integration in the Asia-Pacific region. It has two main financing windows: 1) the Asian Development Bank's Ordinary Capital Resources (OCR), which provides "hard loans" at market rates and "soft loans" to eligible countries at concessional rates; and 2) the Asian Development Fund (AsDF), which provides grants to the region's poorest countries that are at moderate or high risk of debt distress. Prior to January 2017, when AsDF's equity and lending operations were merged with AsDB's OCR, the AsDF provided concessional loans.

**Asian Development Bank**

The AsDB provides long-term loans at market rates to 22 middle-income Asian countries that lack the resources to finance their national economies and build critical infrastructure. AsDB also supports private sector development with technical assistance, loans, guarantees, and direct equity investments in viable private sector projects with strong development impacts. In 2017, AsDB approved \$18.5 billion for projects and leveraged another \$7.5 billion in co-financing from official and commercial sources. Through its lending, AsDB supports the construction of critical infrastructure, the expansion of private enterprise, and sustainable economic growth. The majority of AsDB assistance is for investments in transportation, energy, finance, industry and trade, with water supply, municipal infrastructure, agriculture and natural resources, and public sector management also receiving significant funding. AsDB is financed through capital contributions from donors, income earned on its loan and investment portfolios and bond issuances. No funding is requested for AsDB in 2020.

**Asian Development Fund**

Treasury requests \$47.4 million in support of Asian Development Fund (AsDF) programs over the eleventh replenishment (AsDF-12; FY 2018-FY 2021), including towards the third of four installments to AsDF-12.

AsDF currently provides grants to 18 of the poorest countries in Asia and the Pacific that face moderate or high risk of debt distress, including Afghanistan and Burma. It focuses on supporting inclusive, sustainable economic growth, as well as regional cooperation and integration. Water, energy, and transportation infrastructure compose 48 percent of all AsDF projects, while financial sector deepening, agriculture, and health projects make up the remainder of AsDF grants. AsDF also invests in cross-cutting activities, such as connecting entrepreneurial training with financing for small and medium-sized enterprises. In 2017, the Board approved \$551 million in grants for AsDF-eligible countries. Cumulatively, AsDF has provided over \$50 billion for projects in developing member countries. As a result of the merger of AsDF's lending assets into AsDB's OCR on January 1, 2017, AsDF now provides only grants. AsDF will increase grant support to eligible countries by 70 percent over the period covered under the eleventh replenishment. In recent years, the United States has focused attention within AsDF on countries where support aligns with U.S. national security priorities.

The African Development Bank Group comprises 1) the African Development Bank (AfDB), which lends at market-linked rates to middle-income African countries and Africa's private-sector; and 2) the African Development Fund (AfDF), which provides grants and concessional loans to the poorest African countries. The AfDF account includes a portion of the U.S. commitment to the Multilateral Debt Relief Initiative (MDRI).

**African Development Bank**

The AfDB provides public sector financing at market-linked rates to 20 middle-income African countries, and provides loans, equity investments, lines of credit, and guarantees to support private sector investments in all 54 African member countries. The AfDB had \$7.1 billion in lending approvals in 2018, 68 percent of which was for public sector projects and 32 percent for private sector projects. In 2018, approximately 48 percent of AfDB approvals were for infrastructure, primarily energy and transportation. Other key sectors include finance, agriculture, and governance. The United States is the largest non-regional shareholder of the AfDB, with 6.6 percent of total shareholding, and the second-largest shareholder after Nigeria. No funding is requested for the AfDB in 2020.

**African Development Fund**

Treasury requests \$171.3 million in support of AfDF programs over the fourteenth replenishment (AfDF-14; FY 2018-FY 2020), including towards the third of three installments to AfDF-14.

The AfDF is the AfDB Group's concessional lending window, providing grants and highly concessional loans to the poorest countries in Africa, of which half are fragile or conflict-affected states. In 2018, the AfDF provided \$2 billion in financing, technical assistance, and capacity-building activities to the 38 eligible countries. Many AfDF recipient countries are African economies that are becoming new, emerging markets and growing U.S. trading partners, while other AfDF recipient countries remain trapped in fragility, conflict, and poverty; are highly vulnerable to both internal and external shocks; and are in need of special assistance to achieve basic levels of service delivery. The AfDF is one of the largest official financiers of infrastructure in Sub-Saharan Africa, committing approximately half of its funding to national and regional infrastructure projects in sectors such as energy, transportation, and water and sanitation. The remainder of its funding is devoted to governance, agriculture and food security, and human capital development (e.g., health and education). The AfDF also sets aside special funding for regional projects and fragile and transitioning states; in total, approximately half of its resources are directed to fragile states.

**Multilateral Debt Relief Initiative**

Launched in 2006 at the urging of the United States, the Multilateral Debt Relief Initiative (MDRI) provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the AfDB. Countries receive MDRI benefits after completing the reforms under the HIPC Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development. In accordance with the MDRI donors compensate AfDF for cancelled debt on a dollar-for-dollar basis according to the payment schedules of the original loans. Similar to IDA, AfDF calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Donor commitments must be met within the three-year

replenishment period to avoid a negative impact on the AfDF's commitment capacity. At 11.8 percent burden share, the U.S. share of the cost of MDRI under AfDF-14 (FYs 2018–2020) is \$74 million. No funding is requested for AfDF MDRI in 2020.

Created in 1990, the European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism, predominately through private-sector lending and investments. Its original field of operation in the countries of Central and Eastern Europe and the former Soviet Union was expanded in 2012 to aid in the transitions of key countries in the Middle East and North Africa. No funding is requested for the EBRD in 2020.

The North American Development Bank (NADB) finances infrastructure projects that help preserve, protect, and enhance the environment of the U.S.-Mexico border region in order to advance the well-being of people of both the United States and Mexico. NADB provides funding for projects to benefit communities on both sides of the border. Eligible projects must be located within 100 kilometers of the border on the U.S. side and 300 kilometers on the Mexican side. NADB provides loans and grants to both private sponsors and to municipalities and public utilities. Under its charter the United States and Mexico contribute equally to NADB's capital. No funding is requested in 2020 though there is a request to authorize subscribing to paid-in shares for which funding was previously appropriated.

Pursuant to the Office of Technical Assistance's (OTA) authorizing statute, OTA provides technical assistance to facilitate the implementation of policy, management, and administrative reforms in the areas of budget, revenue, government debt, financial institutions and financial enforcement to developing and transition countries. This assistance supports U.S. foreign policy and national security objectives.

The 2020 Budget includes \$30 million to fund full-time resident technical assistance advisors, intermittent advisors, and program-related administrative costs. The appropriation will support technical assistance programs in Asia, the Middle East, Africa, Latin America, the Caribbean, and Europe. It will enable the provision of technical assistance to developing and transition countries to strengthen the capacity of finance ministries, central banks, and other government institutions to manage public finances and oversee the financial sector. Technical assistance projects support efficient revenue collection, well-planned and executed budgets, judicious debt management, sound banking systems, and strong controls to combat corruption and economic crimes, including terrorist financing. The appropriation will also support Treasury's work to strengthen the financial underpinnings for infrastructure development. OTA will continue to coordinate its activities with the Department of State, USAID, and other relevant U.S. Government agencies as well as international financial institutions and other bilateral donors when determining where its technical assistance program can have the greatest positive impact.

Funds for debt restructuring are periodically needed to help countries reduce the burden of unsustainable debts, thereby establishing a sounder footing for economic growth. Debt relief and restructuring can be fundamental to helping countries stabilize their economies, restart economic growth, and alleviate poverty and instability. Through the Paris Club and

programs such as the Heavily Indebted Poor Countries (HIPC) Initiative, countries that have demonstrated a commitment to economic reforms can benefit from debt restructuring. These programs have provided authority and appropriations to reschedule and/or reduce debt repayments to the U.S. Government, allowing beneficiary countries to increase poverty reduction expenditures in areas such as health, education, and rural development. Debt relief can also be used to promote other U.S. Government priorities. No funding is requested for the Debt Restructuring account in 2020, though the Budget includes authorization in the event a country meets the conditions specified by U.S. law and consistent with U.S. foreign policy considerations for debt relief and restructuring.

**Development Assistance Programs.**—The Development Assistance (DA) account invests in partnerships that support countries' journey to self-reliance to plan, finance, and implement solutions to their own development challenges, to end extreme poverty, and promote resilient, democratic societies around the world. In an effort to streamline accounts and ensure the most effective use of foreign assistance funding, the 2020 Budget consolidates the DA; Economic Support Fund (ESF); Assistance for Europe, Eurasia and Central Asia (AEECA); and Democracy Fund (DF) accounts into the Economic Support and Development Fund account. The 2020 Budget focuses foreign assistance in regions and on sectors that advance our national security and protect the American people, promote U.S. prosperity and economic opportunities, and advance American interests and values around the world, while continuing to support key strategic partners and allies and to ensure efficiency, effectiveness, and accountability to the U.S. taxpayer.

Prior to 2008, funds were appropriated to the Child Survival and Health Programs account to support activities that address family planning/reproductive health; child survival and maternal health, including activities directed at vulnerable children and the primary causes of morbidity and mortality, polio, micronutrients and iodine deficiency; preventing and treating infectious diseases such as malaria and tuberculosis; and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing countries. Additional funding for HIV/AIDS was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds for these activities were appropriated in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.

The purpose of the Assistance for Europe, Eurasia and Central Asia (AEECA) account was to support programs to foster the democratic and economic transitions of the countries of Southeastern Europe and the independent states that emerged from the dissolution of the Soviet Union, as well as related efforts to address social sector reform and combat transnational threats in these countries. From 2013 through 2015, funding for the programs formerly funded through AEECA were included in the Economic Support Fund (ESF), International Narcotics Control and Law Enforcement (INCLE), and Global Health Programs (GHP) accounts. In 2016, Congress reinstated the AEECA account for those programs funded with ESF and INCLE; however, the 2018, 2019, and 2020 requests propose funding all of these programs through the Economic Support and Development Fund, INCLE, and GHP accounts.

In past years, the International Disaster Assistance (IDA) account provided funds to save lives, reduce human suffering, and mitigate and prepare for natural and complex emergencies overseas. As part of an Administration effort to optimize humanitarian assistance, prioritize funding, and use funding as effectively and efficiently as possible, there is no request for IDA. Instead, these funds along with funds for overseas assistance previously requested in the Migration and Refugee Assistance (MRA) account

INTERNATIONAL DISASTER ASSISTANCE—Continued

are consolidated in the new International Humanitarian Assistance (IHA) account.

Funds in IHA will support all aspects of overseas humanitarian assistance, including shelter, protection, emergency health and nutrition, the provision of safe drinking water, livelihoods supports, emergency food interventions, rehabilitation, disaster risk reduction, and transition to development assistance programs and will support the programs of international organizations, including the United Nations High Commissioner for Refugees (UNHCR), the International Committee of the Red Cross (ICRC), and the International Organization for Migration (IOM), the World Food Program (WFP), the UN Office for the Coordination of Humanitarian Affairs (OCHA), as well as non-governmental organizations (NGOs).

The 2020 request also continues to propose eliminating funding for the inefficient food aid in the P.L. 480 Title II account. IHA will ensure that all food assistance programs are appropriate to local needs and will increase overall effectiveness.

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those countries making the transition from the initial crisis stage of a complex emergency to sustainable development and democracy. Programs are focused on advancing peace and stability, including promoting the responsiveness of central governments to local needs, increasing civic participation, raising awareness of national issues through media, addressing the underlying causes of instability, and supporting conflict resolution measures. Recent country examples where TI funds were used include Nigeria, Somalia, Burma, and Ukraine.

TI funding provides core operational funds for the Office of Transition Initiatives within the U.S. Agency for International Development Bureau for Democracy, Conflict, and Humanitarian Assistance.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International

Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service-provider missions and technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account recorded, for the Development Credit Authority (DCA), the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2020, per the modernizations and other reforms included in the Better Utilization of Investments Leading to Development Act of 2018, DCA will be consolidated with other development finance functions, such as the Overseas Private Investment Corporation, into the new U.S. Development Finance Corporation (DFC). All FY 2020 and future DCA activities are presented in the DFC accounts.

The Overseas Private Investment Corporation (OPIC) encourages the participation of United States private sector capital and skills in the economic and social development of developing countries and emerging market economies. Its primary noncredit program is political risk insurance against losses due to expropriation, inconvertibility, and damage due to

political violence. Balances in this account are reserves held for potential claims and are not expected to be obligated.

On October 5, 2018, the President signed into law the Better Utilization of Investments Leading to Development Act of 2018 (The BUILD Act). The BUILD Act consolidates, modernizes and reforms the U.S. Government's development finance capabilities—primarily OPIC and the Development Credit Authority (DCA) of the U.S. Agency for International Development (USAID)—into a new agency: the United States International Development Finance Corporation (DFC).

The Overseas Private Investment Corporation (OPIC) encourages the participation of United States private sector capital and skills in the economic and social development of developing countries and emerging market economies. Its credit program is investment financing through loans and guaranteed loans. As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

On October 5, 2018, the President signed into law the Better Utilization of Investments Leading to Development Act of 2018 (The BUILD Act). The BUILD Act consolidates, modernizes and reforms the U.S. Government's development finance capabilities—primarily OPIC and the Development Credit Authority (DCA) of the U.S. Agency for International Development (USAID)—into a new agency: the United States International Development Finance Corporation (DFC). All FY 2020 and future OPIC activity will be presented in the DFC accounts.

The Budget proposes to eliminate funding for several independent agencies, including for the U.S. Trade and Development Agency (USTDA), as part of the Administration's plans to move the Nation towards fiscal responsibility, to redefine the proper role of the Federal Government, and to prioritize rebuilding the military and making critical investments in the Nation's security. The United States has several other agencies that will continue to promote exports, support American businesses overseas, and facilitate international infrastructure development. These include the U.S. Export-Import Bank, the U.S. Department of Commerce, the U.S. International Development Finance Corporation, and the U.S. Agency for International Development. The Budget requests \$12.1 million to conduct an orderly closeout of the agency beginning in fiscal year 2020, which includes funding for personnel costs, including severance payments and salaries for essential personnel during the closeout; rental payments; and other costs related to termination.

On October 5, 2018, President Donald J. Trump signed into law the Better Utilization of Investments Leading to Development Act of 2018 (The BUILD Act). The BUILD Act consolidates, modernizes and reforms the U.S. Government's development finance capabilities—primarily the Overseas Private Investment Corporation (OPIC) and the Development Credit Authority (DCA) of the U.S. Agency for International Development (USAID)—into a new agency: the United States International Development Finance Corporation (DFC). The DFC will mobilize and facilitate the participation of private sector capital and skills in the economic development of less developed countries. This facilitation of private sector investment will have a positive developmental impact through transactions the private sector would not do on its own. All future DFC insurance and equity activities are presented in the DFC Corporate Capital Account.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this account and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

In order to streamline the panoply of international affairs agencies operating today, the Budget proposes consolidating small grants functions and assistance aimed at reaching poor and remote communities that is currently carried out by the Inter-American Foundation (IAF) into the U.S. Agency for International Development (USAID) in FY 2020. To facilitate the consolidation, the Budget requests funding to conduct an orderly closeout of IAF beginning in fiscal year 2020, which includes sufficient funding

for severance payments for duplicative functions not merged into USAID and other miscellaneous requirements for an orderly shutdown.

In order to streamline the panoply of international affairs agencies operating today, the Budget proposes consolidating small grants functions and assistance aimed at reaching poor and remote communities that is currently carried out by the U.S. African Development Foundation (ADF) into the U.S. Agency for International Development (USAID) in FY 2020. To facilitate the consolidation, the Budget requests funding to conduct an orderly closeout of ADF beginning in fiscal year 2020, which includes sufficient funding for severance payments for duplicative functions not merged into USAID, lease termination fees, and other miscellaneous requirements for an orderly shutdown.

The United States participates in the International Monetary Fund (IMF) through a quota subscription, denominated in Special Drawing Rights (SDRs). Under reforms to IMF quotas decided in 2010 and implemented by the IMF in early 2016 after Congress passed the necessary legislation ratifying the reforms, the U.S. quota at the IMF increased by SDR 40,871,800,000 (approximately \$58 billion using the current exchange rate) to SDR 82,994,200,000 (approximately \$117 billion using the current exchange rate). Quotas are the main metric used by the Fund to assign voting shares and to determine countries' contributions to the IMF's general resources and access to IMF financing.

The use of the U.S. quota resources by the IMF constitutes an exchange of monetary assets and does not result in net budget outlays. When the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113) directs that the budgetary authority and outlays of the 2016 quota increase be recorded on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 quota increase is also now executed on a present value basis.

5116 New Arrangements to Borrow .....	39,858	39,858	

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's quota resources to forestall or cope with an impairment of the international monetary system. GAB participants decided in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$6 billion using the current exchange rate). In December 2017, GAB participants decided unanimously that the GAB should be allowed to lapse when its current term ends on December 25, 2018. Accordingly, the GAB decision lapsed on December 25, 2018. The non-renewal of the GAB will have no budget implications for the United States as amounts authorized for the GAB are also authorized to be used for the New Arrangements to Borrow (NAB).

In January 1997, the Executive Board of the IMF approved the creation of the NAB, which is a standing arrangement among certain IMF members to supplement the IMF's quota resources as needed to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998.

By the end of 2016, following reduction of the NAB as part of the 2010 IMF reforms (see the account entitled "United States Quota, International Monetary Fund"), 38 countries and institutions participated in the NAB for a total of SDR 181 billion (about \$255 billion), of which the U.S. share was approximately SDR 28 billion (about \$40 billion). The NAB is currently not activated.

With respect to this account, resources provided by the United States under the NAB constitute an exchange of monetary assets and do not result in any net budgetary outlays because such transactions result in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. U.S. claims on the IMF under the NAB are readily available to meet a U.S. balance-of-payments financing need.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114–113) rescinded SDR 40,871,800,000 from U.S. participation in the NAB. The Act also directs that the budget authority and outlays of the NAB rescission be recorded on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 NAB increase is also now executed on a present value basis.

The Special Defense Acquisition Fund (SDAF) helps to better support coalition and other U.S. partners participating in U.S. overseas contingency and other operations; and expedite the procurement of defense articles for provision to foreign nations and international organizations. The 2020 request reflects \$900 million in new SDAF obligation authority, to be funded by offsetting collections. In 2020, offsetting collections will be derived from SDAF sales of stock as well as other receipts consistent with section 51(b) of the Arms Export Control Act. The 2020 request will support advance purchases of high-demand equipment that has long procurement lead times, which is often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective in a timely manner. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.

The new International Humanitarian Assistance (IHA) account supports the Administration's commitment to deliver the fundamental changes needed to optimize the effectiveness of our overseas humanitarian assistance and seamlessly coordinate policy and implementation across State and USAID. As conflict-based crises increase and force multiple displacements of populations within and outside their national borders, the 2020 request seeks to adapt and significantly improve our ability to respond flexibly by consolidating all overseas humanitarian assistance in a single account so that funds can adjust as needed to reach affected persons.

Accordingly, the Budget consolidates our fragmented and outdated overseas humanitarian programming, implementation, and oversight of all implementers into one account and in a new bureau at USAID. The Budget preserves State's lead role on humanitarian, migration, and population policy issues, policy oversight of international organizations, and related diplomatic engagement, as well as the U.S. refugee admissions program (USRAP). Funding in the new IHA account will be appropriated to the President, but will be administered by USAID subject to a new senior, dual-hatted State and USAID leadership structure under the authority of the Secretary of State, but reporting to both the Secretary and the Administrator of USAID. This new account and organizational structure will enable the U.S. government to respond seamlessly to ongoing as well as new humanitarian needs of the most vulnerable displaced people, including refugees, conflict victims, stateless persons, and migrants worldwide. The Budget pairs this restructuring, which builds on State's and USAID's comparative strengths, with a new high-level, dual-hat humanitarian leadership structure at State and USAID under the authority of the Secretary

INTERNATIONAL HUMANITARIAN ASSISTANCE—Continued

of State. This restructuring is also critical to establishing a strong, unified U.S. voice that can extract optimal UN reforms, to induce other donors to do their fair share, and to resolve ongoing crises.

The Budget does not request funds in the International Disaster Assistance (IDA) account or for overseas humanitarian assistance in the Migration and Refugee Assistance (MRA) account. Programs related to U.S. refugee admissions and certain other administrative expenses will continue to be funded through the MRA account, discussed separately in the Appendix. In addition, appropriations language under the MRA account gives the Secretary of State authority to transfer funding from IHA to MRA should projected funding for refugee resettlement not be sufficient. The 2020 request also continues to eliminate the P.L. 480 Title II account. The IHA request will ensure that all food assistance programs are appropriate to local needs and will increase overall effectiveness. The 2020 request enables the United States to remain the largest single humanitarian donor in the world.

Specifically, these funds support all aspects of overseas humanitarian assistance, including shelter, protection, emergency health and nutrition, the provision of safe drinking water, livelihoods supports, emergency food interventions, rehabilitation, disaster risk reduction, and transition to development assistance programs. Emergency food aid can include interventions such as local and regional purchase of food near crises, the provision of U.S. commodities, food vouchers, or cash transfers, and complementary activities that support the relief, recovery, and resilience of populations affected by food crises. Funds will support the programs of international organizations, including the United Nations High Commissioner for Refugees (UNHCR), the International Committee of the Red Cross (ICRC), and the International Organization for Migration (IOM), the World Food Program (WFP), the UN Office for the Coordination of Humanitarian Affairs (OCHA), as well as non-governmental organizations (NGOs).
